

Acknowledgement

We would like to acknowledge CodeEdHub for its dedication to providing a valuable resource for the coding community. CodeEdHub offers a diverse range of services, including curated lists of trending and top courses, templates for website and mobile app design, project ideas, and insights into the best job opportunities in the ever-evolving tech industry. With its commitment to empowering learners and professionals alike, CodeEdHub stands as a beacon of excellence in the field of coding education. We applaud CodeEdHub for its efforts to make coding education accessible, relevant, and impactful for individuals striving to succeed in the digital age. From trending courses to top-rated selections, our curated collection ensures users stay ahead of the curve in their learning journey. Additionally, our meticulously crafted templates for website and mobile app design serve as invaluable tools for aspiring developers to bring their visions to life with professionalism and style. With insights into project titles and the best job prospects for the next five years, CodeEdHub is your ultimate destination for staying informed and inspired in the ever-evolving tech landscape.

1. Introduction

Welcome to CodeEdHub, your all-in-one destination for navigating the dynamic world of coding education. Whether you're a seasoned developer looking to stay ahead of the latest trends or a newcomer eager to embark on your coding journey, CodeEdHub is here to empower you every step of the way.

Embark on a transformative journey with CodeEdHub, your one-stop platform for unparalleled coding education. Dive into our curated selection of trending and top-rated courses, meticulously designed to keep you at the forefront of technological innovation. From web and mobile app design templates to insights on future job prospects, CodeEdHub equips you with the tools and knowledge needed to thrive in the dynamic world of coding.

1.1 Existing System

Course Selection Process Across Multiple Websites :

Currently, users seeking courses, templates, jobs, and project titles must navigate through numerous websites, each offering a different set of resources. This scattered approach often leads to inefficiencies as users are required to visit multiple platforms to access the variety of materials they need. For beginners, in particular, this can be daunting as they attempt to navigate the vast array of options available across different websites, leading to confusion and potentially inhibiting their learning journey.

1.2 Need for the New System

Centralized Platform :

CodeEdHub addresses the fragmented nature of the existing system by consolidating all resources into one centralized platform. Here, users can access a comprehensive range of courses, templates, job listings, and project titles without the need to visit multiple websites. By providing a one-stop destination for all coding-related resources, CodeEdHub streamlines the user experience, saving time and effort while eliminating the need for users, especially beginners, to navigate through various platforms.

1.3 Objective of the New System

Beginner-Friendly Course Selection : To provide beginners with guidance and assistance in sorting through the multitude of available courses, offering curated recommendations based on skill level, interests, and career goals to facilitate a smooth and informed learning journey.

Insights into Future Job Trends : To empower users, particularly beginners, with valuable insights into the job market by providing forecasts on which jobs will be in demand in the next five years, helping them make informed decisions about their career paths and skill development.

Templates for Project Titles : To offer a collection of templates and resources for project titles, assisting beginners in brainstorming and selecting suitable project ideas to practice their coding skills and build their portfolios.

1.4 Problem Definition

In the current landscape, individuals interested in coding education face a fragmented experience as they seek courses, templates, jobs, and project titles scattered across various websites. This scattered approach presents inefficiencies, requiring users to navigate through multiple platforms to access the diverse range of resources they seek. For beginners, this fragmented landscape proves particularly daunting, as they struggle to navigate the vast array of options available across different websites. This lack of centralization leads to confusion and inefficiency, potentially inhibiting the learning journey of users and hindering their ability to access the resources they need to succeed in the coding field.

1.5 Core Components

Course Repository : A comprehensive database of coding courses covering a wide range of topics, languages, and skill levels, allowing users to explore and enroll in courses that align with their interests and learning goals.

Template Library : A curated collection of templates for website and mobile app design, providing users with ready-made designs and resources to kickstart their projects and enhance their coding skills.

Job Board : A job board featuring listings for coding-related job opportunities, including information on job roles.

Project Titles : Project title ideas and prompts for coding projects, offering some basic ideas to users as they embark on their coding journey and work on personal or group projects.

User Profiles : Personalized user profiles where users can add their saved courses, view course enrollments.

1.6 Project Profile

CodeEdHub is a centralized web platform revolutionizing coding education by offering a comprehensive range of resources, including courses, templates, job listings, and project ideas. CodeEdHub simplifies learning and empowers users at all skill levels to succeed in the world of coding.

1.7 Assumptions and Constraints

Assumptions:

User Demand: There is a significant demand for centralized coding education platforms among individuals interested in learning coding skills.

Availability of Content: The sufficient supply of high-quality coding courses, templates, job listings, and project ideas available for inclusion on the platform.

Technological Infrastructure: The availability of reliable internet connectivity and access to devices capable of accessing the CodeEdHub website.

Constraints:

Technical Constraints: Limited resources and technical expertise may constrain the development and maintenance of the platform, leading to potential delays or limitations in functionality.

Budget Constraints: Financial constraints may limit the scope of development and marketing efforts for CodeEdHub, impacting the platform's ability to reach and attract users.

Content Quality: Ensuring the quality and relevance of the content featured on CodeEdHub may be challenging, as it relies on external sources for course materials, templates, and job listings.

User Adoption: User adoption may be slower than anticipated, particularly among beginners who may be hesitant to transition to a new platform or prefer traditional methods of learning.

Competition: CodeEdHub may face competition from existing coding education platforms and other online resources, potentially impacting its ability to attract and retain users.

1.8 Advantages and Limitations of the Proposed System.

Advantage :

Convenience: CodeEdHub offers unparalleled convenience by bringing together all coding-related resources under one roof. Users no longer need to juggle multiple tabs or remember different website URLs, simplifying the learning process.

Enhanced User Experience: With a user-friendly interface and intuitive navigation, CodeEdHub prioritizes the user experience, ensuring that users can easily find and access the resources they need.

Comprehensive Content: From trending courses to top-rated templates and job listings, CodeEdHub offers a comprehensive range of resources to cater to users at every stage of their coding journey.

Personalized Recommendations: By leveraging user data and preferences, CodeEdHub provides personalized recommendations, ensuring that users discover content tailored to their individual interests and skill levels.

Increased Engagement: With features such as progress tracking and reminders, CodeEdHub fosters continued engagement with the platform, motivating users to achieve their learning goals and stay informed about the latest developments in the tech industry.

Limitations :

Content Quality Control : Ensuring the quality and relevance of the content featured on CodeEdHub could be challenging, as it relies on external sources for courses, templates, and job listings. There may be inconsistencies in content quality and relevance across different providers.

Limited Course Offerings : CodeEdHub's course offerings may be limited, especially in niche or specialized topics, depending on the availability of content providers willing to collaborate with the platform.

Dependency on External Partners : CodeEdHub's success is dependent on collaboration with educational institutions, coding bootcamps, and industry partners to expand the range of resources available on the platform. Any disruptions or changes in these partnerships could impact the platform's content offerings and user experience.

Competition : CodeEdHub may face stiff competition from existing coding education platforms and other online resources, making it difficult to attract and retain users in a crowded market.

2. Requirement Determination Analysis

2.1 Requirements Determination

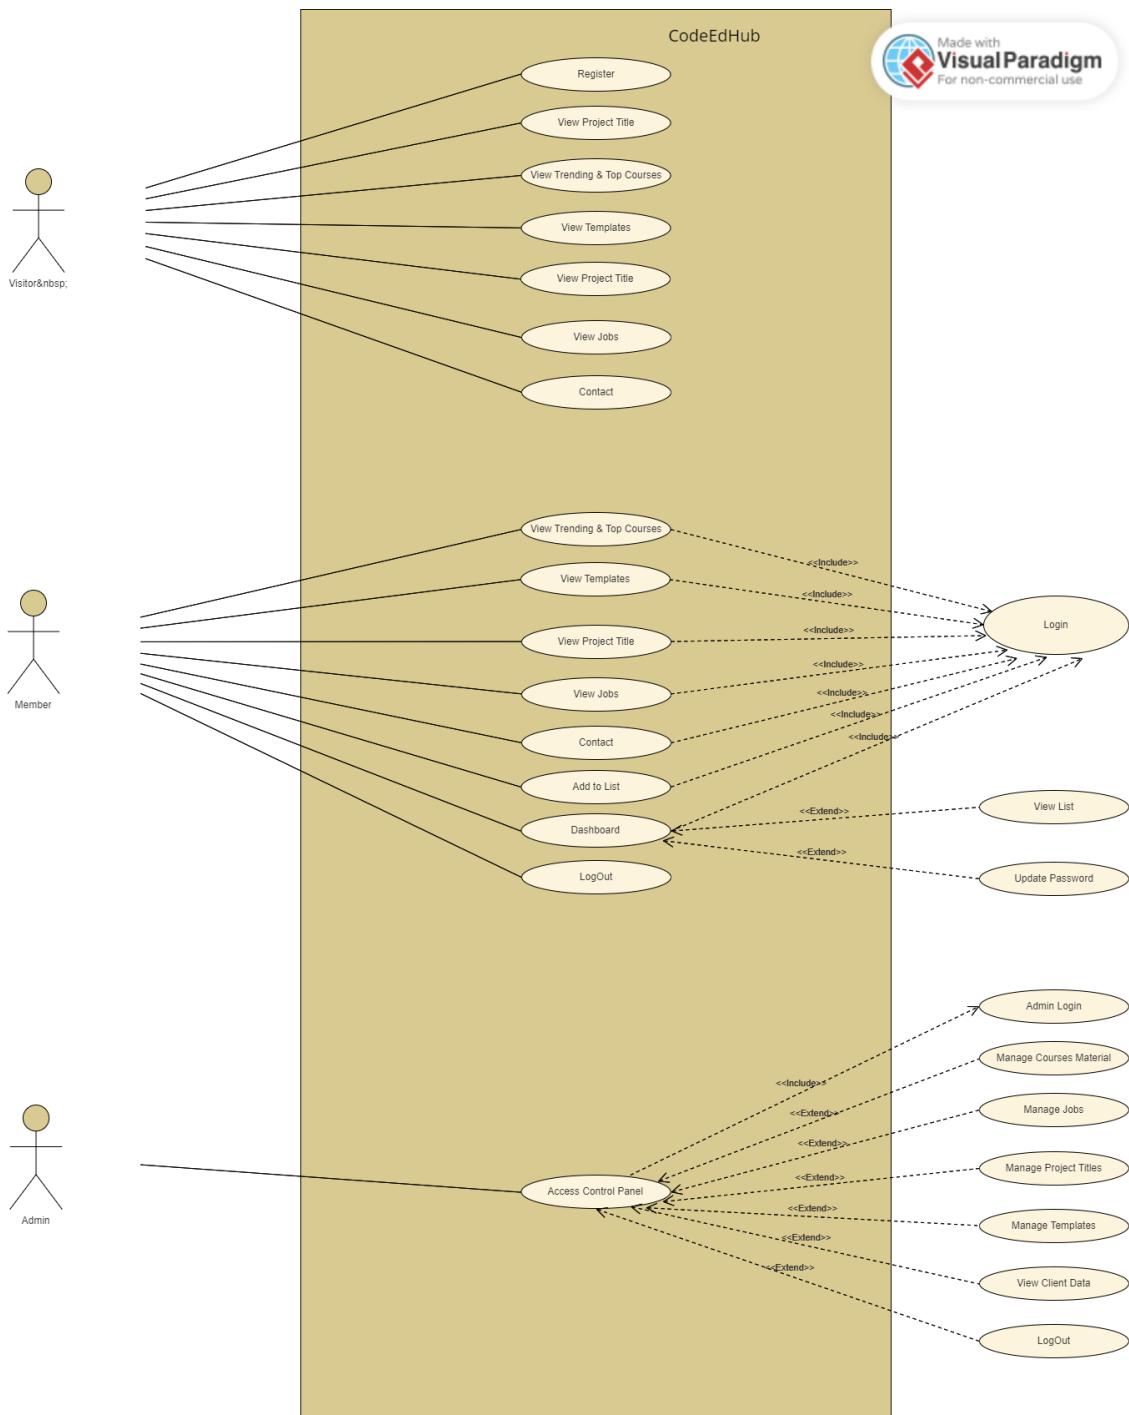

In determining the requirements for CodeEdHub, thorough user surveys, market research, and stakeholder consultations were conducted to understand the needs and preferences of our target audience. Through these efforts, we identified key features such as personalized recommendations, user-friendly interfaces, and curated content to prioritize in the platform's development. Prototype testing and technical assessments further validated our decisions, ensuring that CodeEdHub offers a seamless and valuable experience for users seeking coding education resources.

2.2 Targeted User

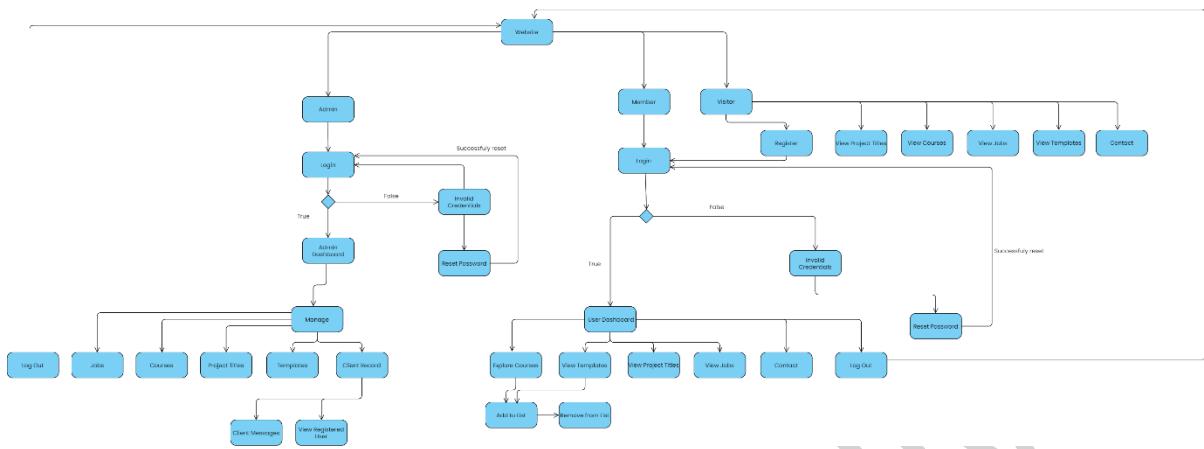

CodeEdHub caters to a diverse range of users, including beginners, intermediate learners, experienced professionals, educators, mentors, employers, and recruiters. Whether users are just starting their coding journey or looking to advance their careers in the tech industry, CodeEdHub provides a supportive and comprehensive platform for learning, networking, and career advancement. By tailoring content and features to meet the needs of each user segment, CodeEdHub aims to empower individuals at every stage of their coding education and professional development journey.

ENG IN 01-04-2024

The screenshot shows the CodeEdHub index page with a dark theme. On the left is a sidebar with navigation links: Home, About, Explore, Contact Us, Create an Account, Log In, and Admin Panel. The main content area displays six job cards:

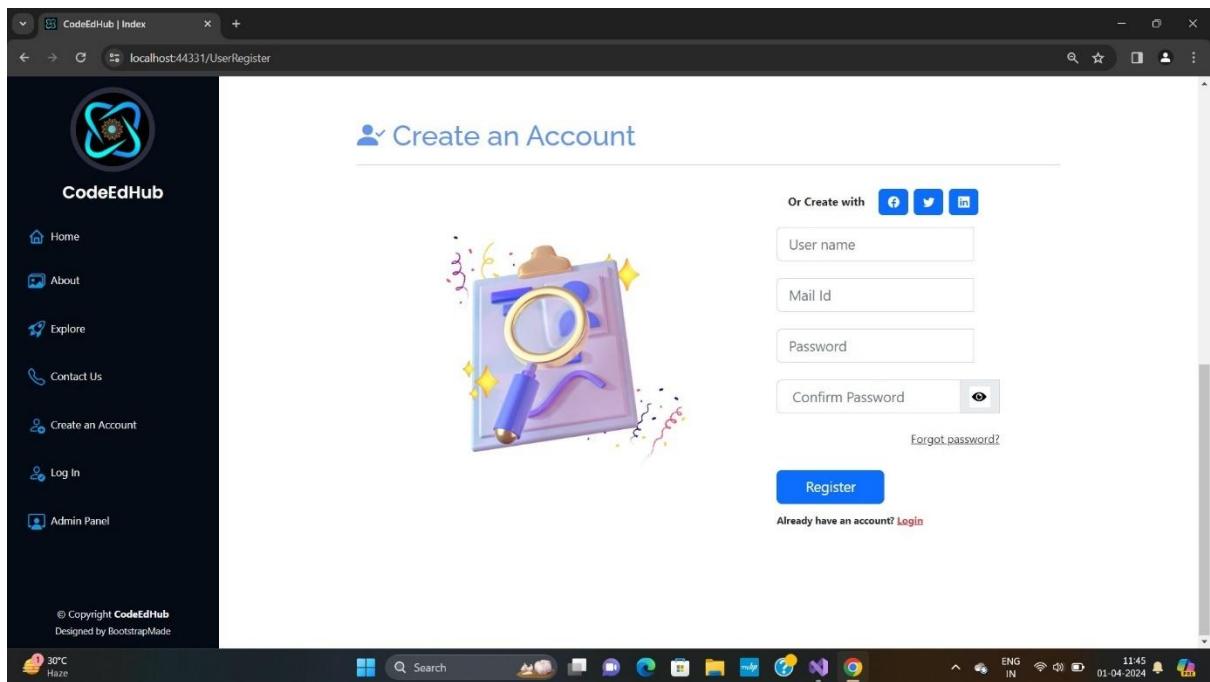

- Cloud Architect**: 3.59,206 - 23.59,206. In 5 years, cloud computing's scope expands for versatile business solutions. Cloud architects design and manage cloud infrastructure for optimal business performance.
- Cyber Security**: 4,00,000 - 10,00,000. Growing demand in next 5 year for cybersecurity experts to protect digital assets.
- Data Scientist**: 3,00,000 - 28,00,000. Rising demand for data scientists due to increasing reliance on data-driven decisions.
- Digital Marketer**: 2,88,000 - 13,00,000. Digital marketers will remain essential for varied business strategies in 5 years. Digital marketers drive diverse business strategies effectively through online channels.
- Full Stack Developer**: 60,000 - 72,500. There are huge openings in this branch of the IT sector.
- Machine learning Engineer**: 7,00,000 - 14,00,000. ML Leads or Experts specialize in guiding ML projects and developing advanced models for business challenges.

At the bottom of the page is a footer with copyright information and a weather widget showing 30°C Haze.

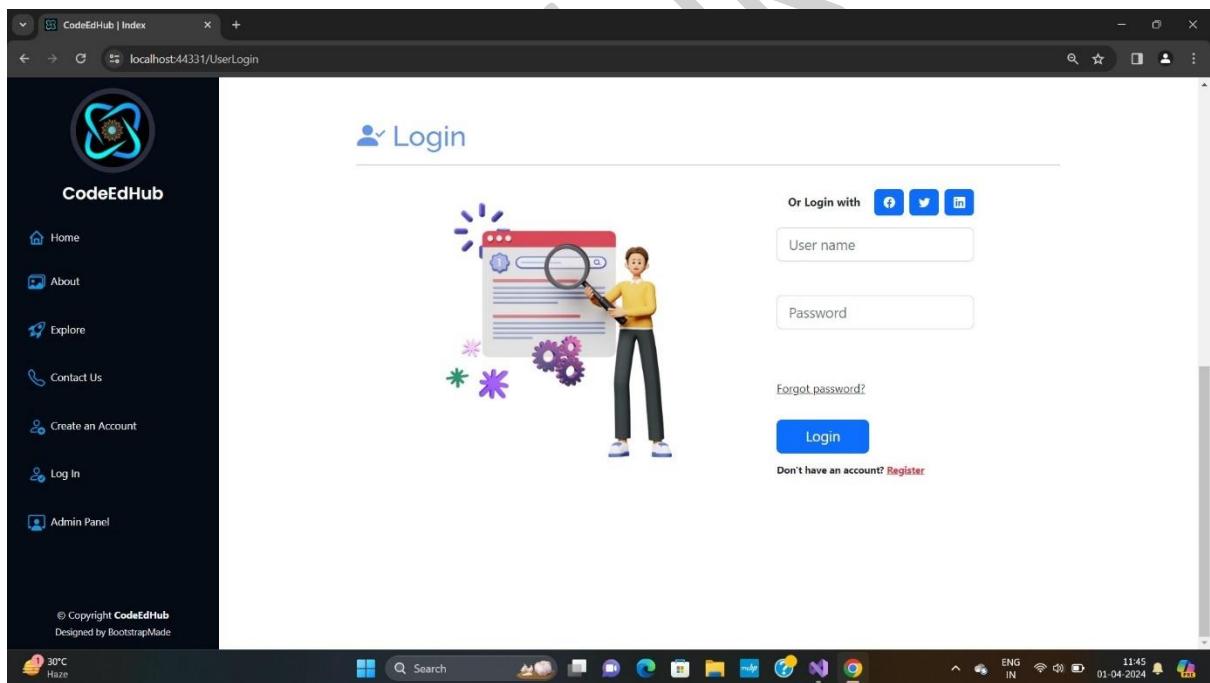

Contact Page

The screenshot shows the CodeEdHub contact page. The sidebar on the left is identical to the index page. The main content area has a heading "Contact" and a sub-heading: "Reach out and connect with us! Whether you have questions, feedback, or just want to say hello, we're here to listen. Get in touch with our friendly team today". It includes three contact points: Location (A108 Adam Street, New York, NY 10002), Email (info@example.com), and Call (+1 5589 55488 55). A map of the New York City Financial District is displayed, showing the location of the Downtown Conference Center. To the right is a "Message" form with fields for Name, Mail Id, Contact Number, and Message, along with a "Send Message" button.

11:50 01-04-2024 ENG IN

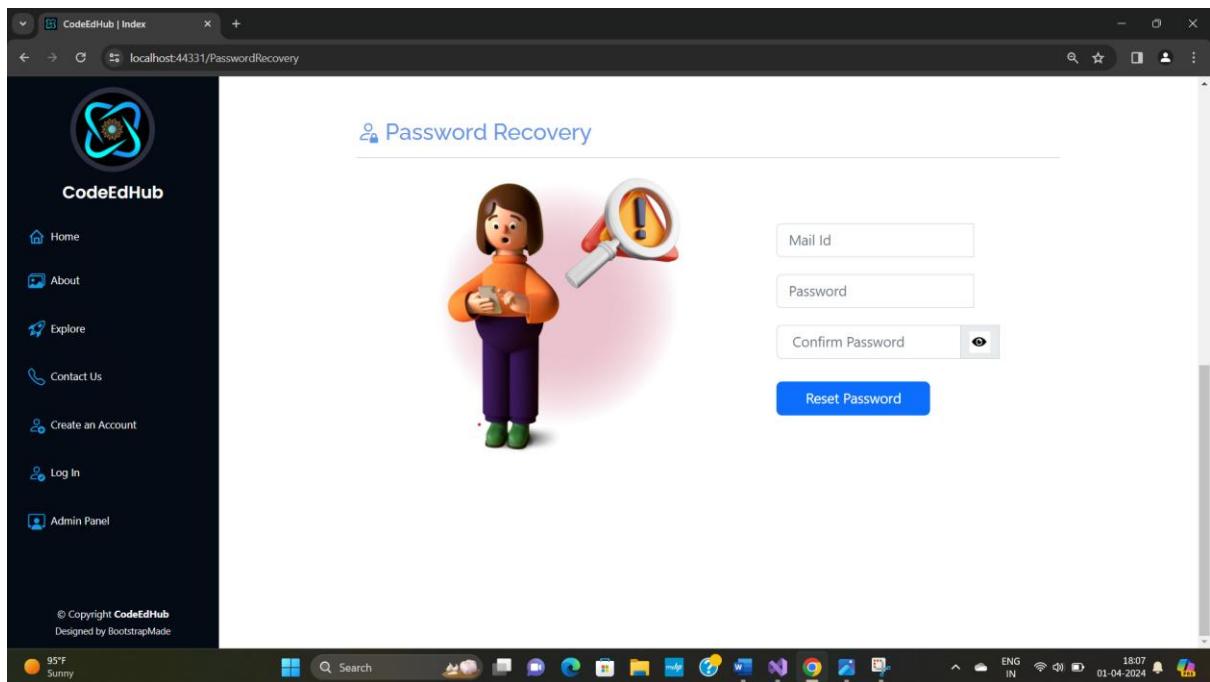

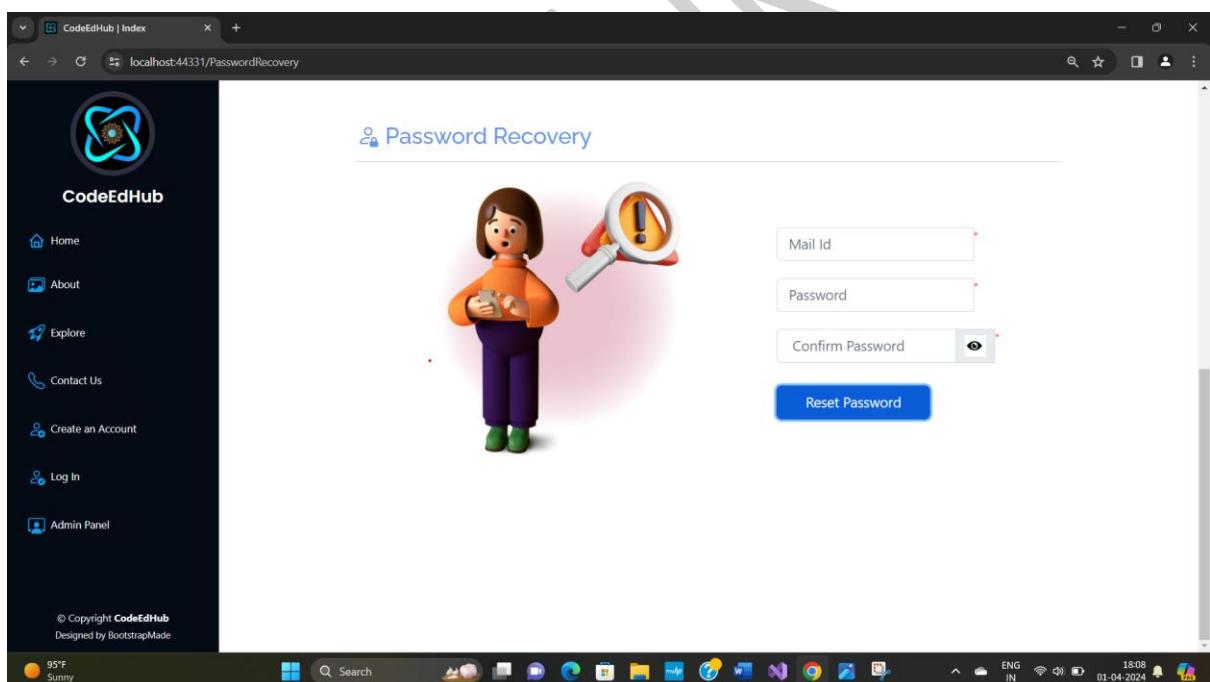

If user forgets password or enter invalid password then they can click on forget password link to reset the password.

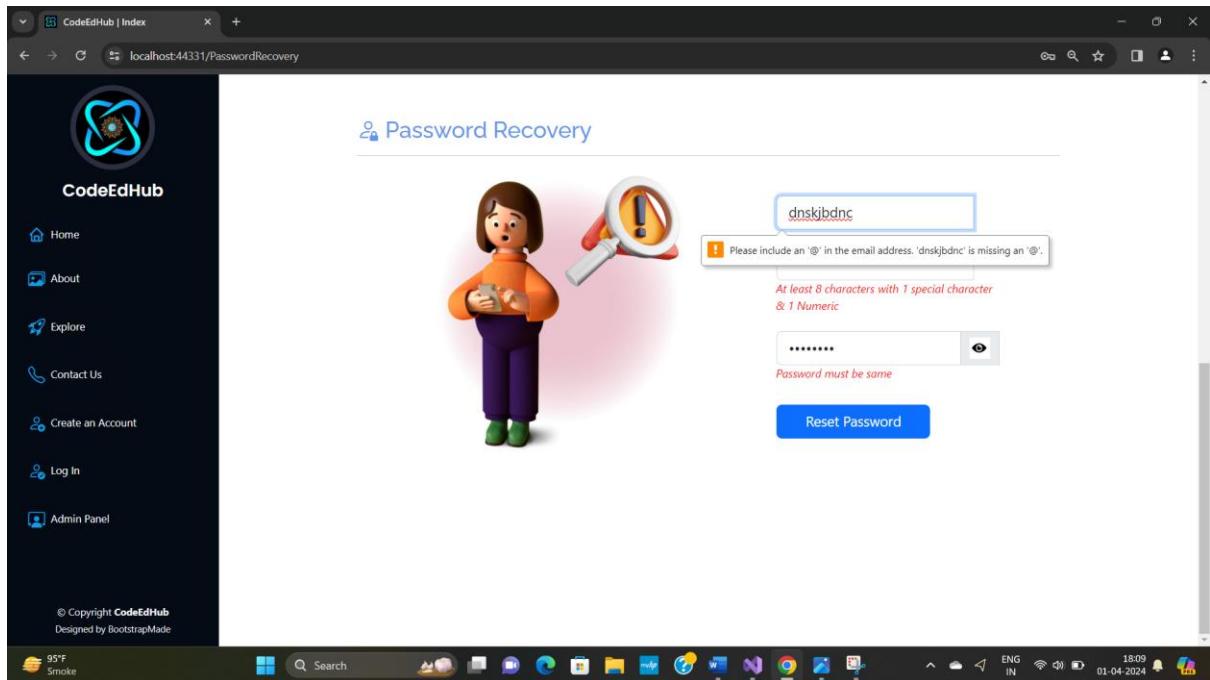

It will redirect to password recovery page to reset the password.

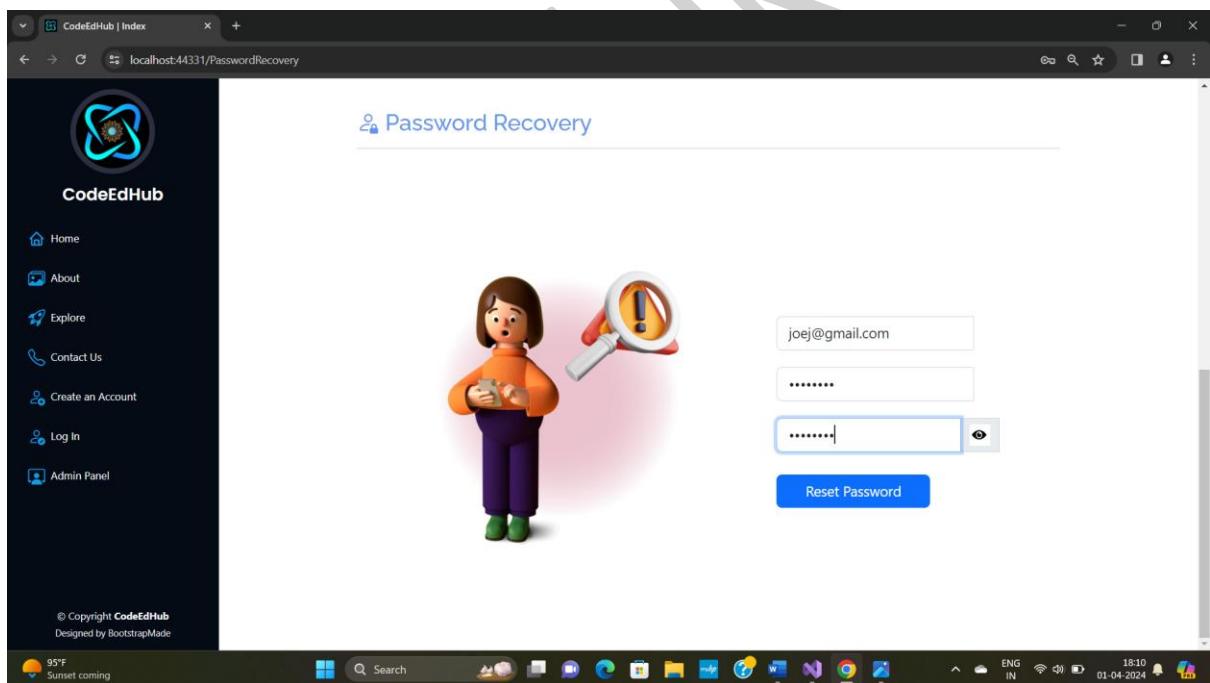

Validation on password recovery page.

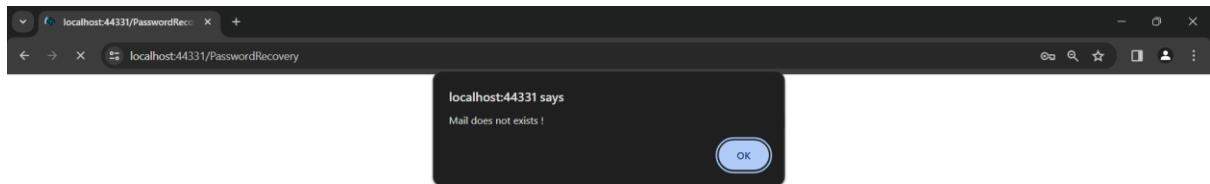

Filling password as per requirements but with invalid email id.

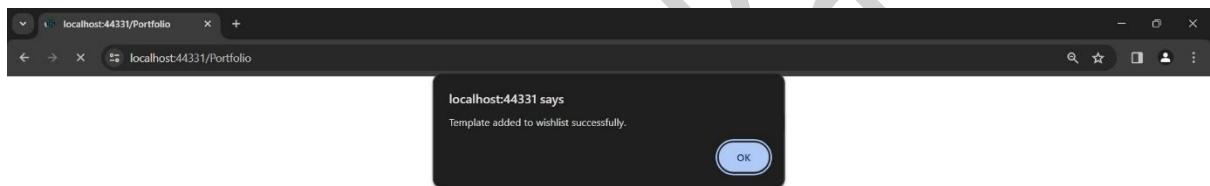

Will not allow user to reset password with invalid email id.

When user enter correct data for login they will be redirected to their dashboard.

A screenshot of a web browser window titled "CodeEdHub | Index" and "localhost:4431/UserDashboard". The page is titled "User Dashboard" and "My Profile". On the left, there is a sidebar with a logo, "Hello Priya", and links for "Home", "About", "Explore", "Contact Us", "Dash Board", and "Log Out". The main content area shows "User Detail" with fields for "User Name" (Priya) and "Mail Id" (priya@yahoo.com). Below that is a "Update Password" section with fields for "Old Password" (priya@098), "New Password", and "Confirm Password". At the bottom right is a blue "Update Profile" button. The system tray at the bottom shows the date (01-04-2024), time (11:52), battery level, signal strength, and language (ENG IN).

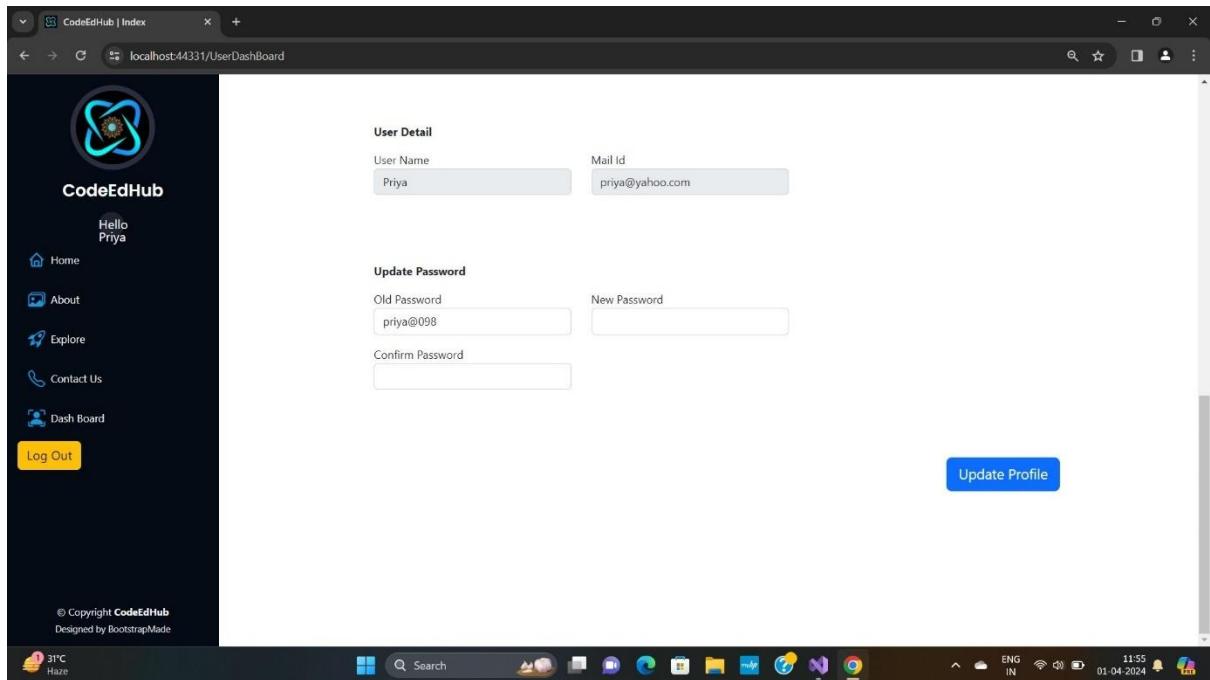

The screenshot shows a web browser window for 'CodeEdHub | Index' at 'localhost:44331/Portfolio'. On the left is a dark sidebar with a user icon and the text 'Hello Priya'. Below it are links for Home, About, Explore, Contact Us, and Dash Board, with 'Log Out' highlighted. The main content area has a heading 'Explore' with a sub-section about trending courses. It features six mobile application templates: 'SOCIAL MEDIA APPLICATION MOBILE TEMPLATE', 'RECIPE APPLICATION MOBILE TEMPLATE', 'RESTAURANT APPLICATION MOBILE TEMPLATE', 'GROCERY', and 'RESTAURANT'. Each template has a 'Join Now' button. The bottom of the screen shows a Windows taskbar with various icons and the date/time '01-04-2024 11:54'.

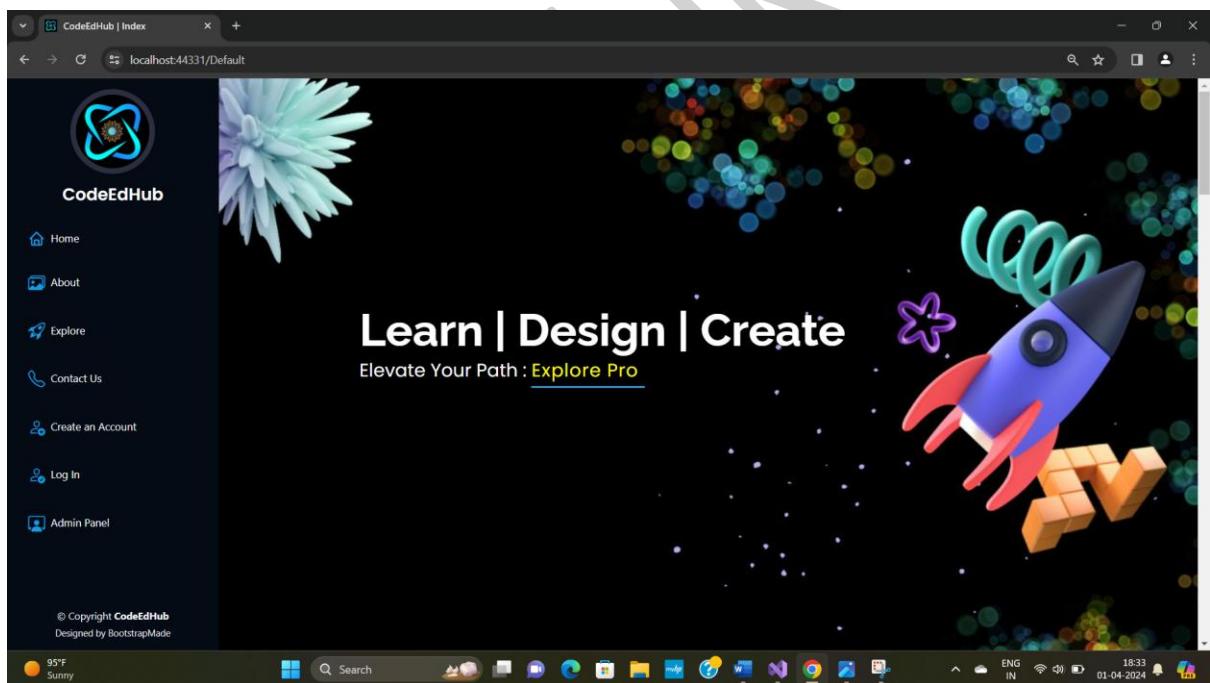

The screenshot shows the CodeEdHub User Dashboard. On the left is a sidebar with a logo, user name "Hello Priya", and links for Home, About, Explore, Contact Us, Dash Board, and Log Out. The main content area has a heading "Update Password" with fields for Old Password (priya@098), New Password, and Confirm Password. A blue "Update Profile" button is at the bottom right. Below this is a table titled "Image" with columns for Image, Title, Link, and Actions. It shows one item: "Social Media Application | Type : Template Design for Mobile Application | *Only for reference." with a "More Details" link and a "Remove" button. At the bottom of the page is a footer with copyright information and a weather widget showing 31°C Haze.

By clicking on remove button it will be removed from saved list.

The screenshot shows the CodeEdHub User Dashboard. A modal dialog box is centered, displaying the message "localhost:4431 says" and "Template Design removed from wishlist successfully." with an "OK" button. The background content is identical to the previous screenshot, showing the "Update Password" form and the wishlist table. The bottom of the screen shows the Windows taskbar with various pinned icons and system status indicators.

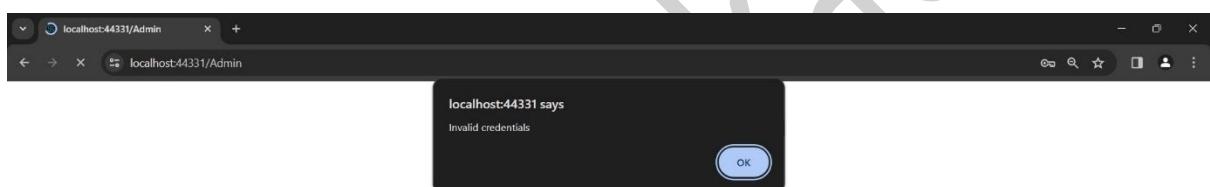

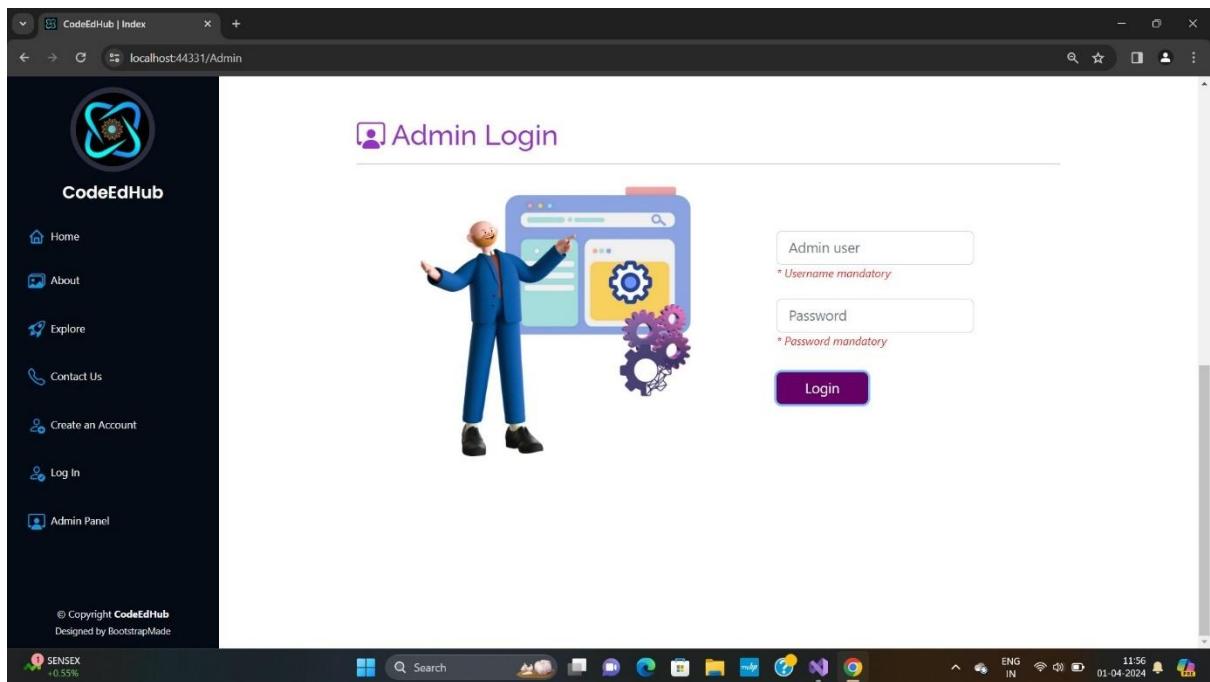

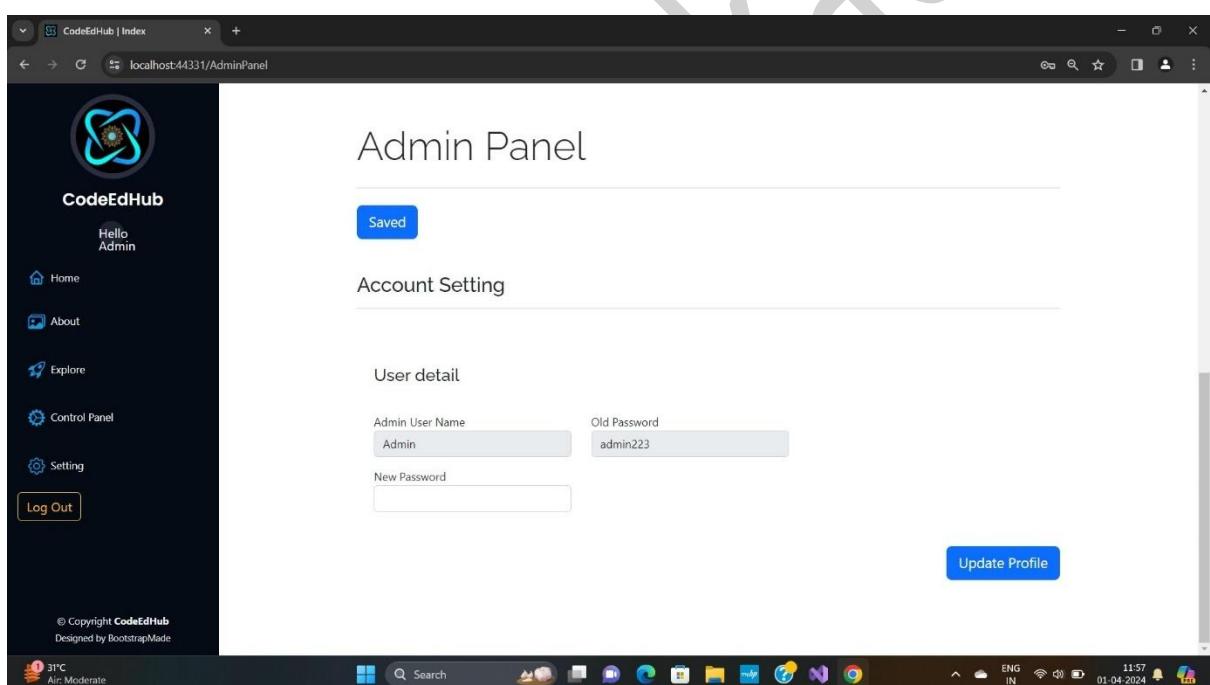

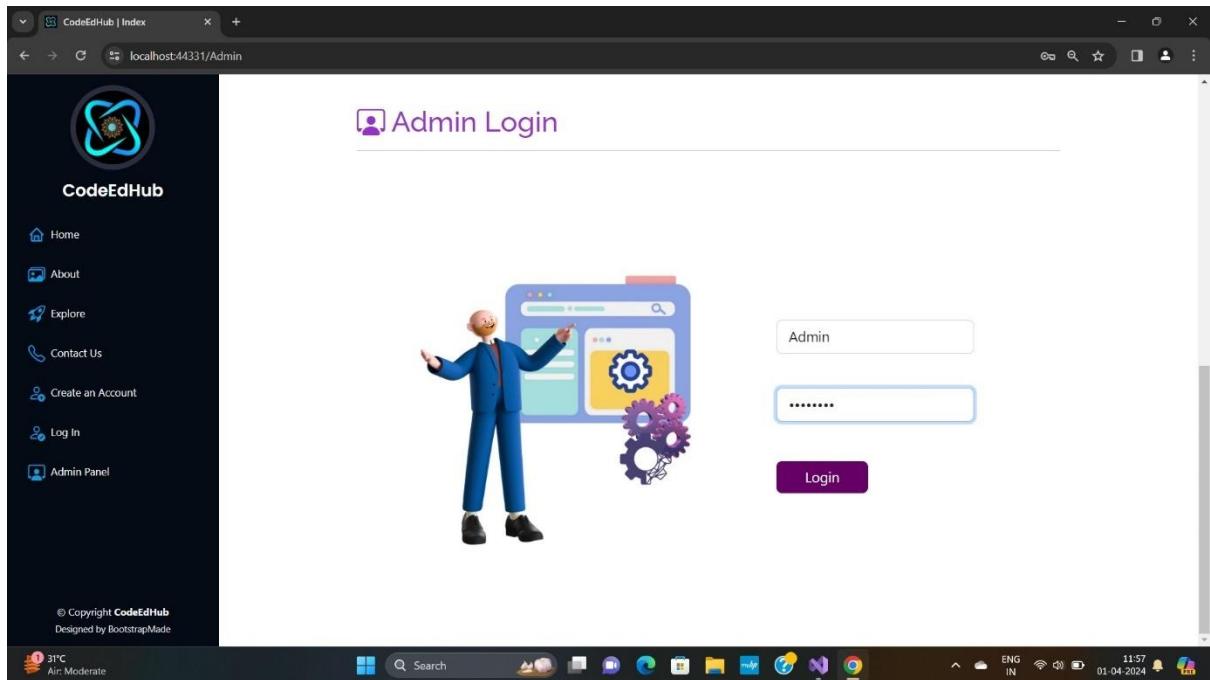

Clicking on Logout button will logout user from their dashboard and redirected to index page.

Validation at Admin side.

System will not allow admin to insert invalid details to log in . If admin enters correct details then an only it will redirect to admin dashboard.

Clicking on View Top Courses it will redirect to Courses page where admin can manage insert , update , delete courses.

The screenshot shows the 'Control Panel' section of the CodeEdHub application. On the left, a dark sidebar menu includes 'Hello Admin', 'Home', 'About', 'Explore', 'Control Panel' (which is selected), 'Setting', and 'Log Out'. Below the sidebar is a copyright notice: '© Copyright CodeEdHub Designed by BootstrapMade'. The main content area features a banner with a flower and bokeh lights. It contains several cards: 'Top Courses' (with a 'View Top Courses' button), 'Templates' (with a 'View Templates' button), 'Job Alert' (with a 'View Jobs' button), 'Project Titles' (with a 'View Project Titles' button), 'Trending Courses' (with a 'View Courses' button), and 'Client Data' (with a 'Client Data' button). The bottom of the screen shows a Windows taskbar with various icons and system status.

The screenshot shows the 'Courses' section of the CodeEdHub application. The sidebar menu is identical to the Control Panel. The main content area displays a table titled 'Courses' with columns 'CourseId' and 'CourseTitle'. The table lists 11 entries, each providing details about the course platform, duration, name, purchase information, and completion certificate. The bottom of the screen shows a Windows taskbar with various icons and system status.

To update enter a specific id for that course in ID column and click on search it will fill all textboxes with that data and then you can update the existing data.

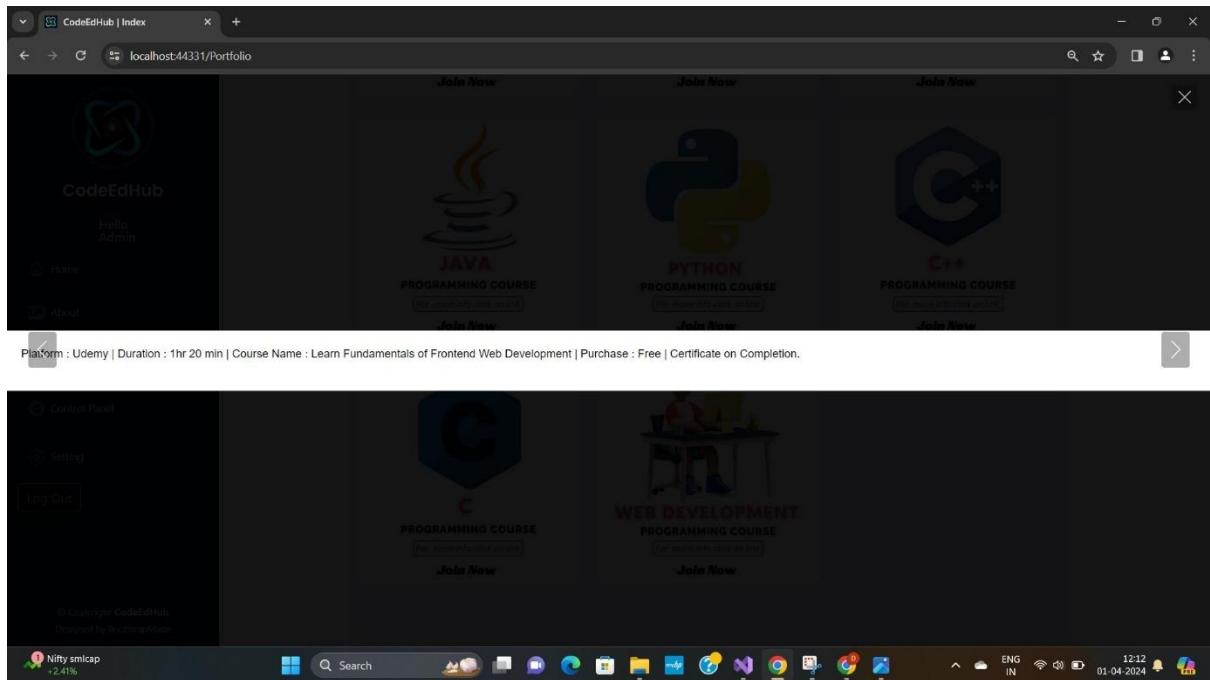

Course is added.

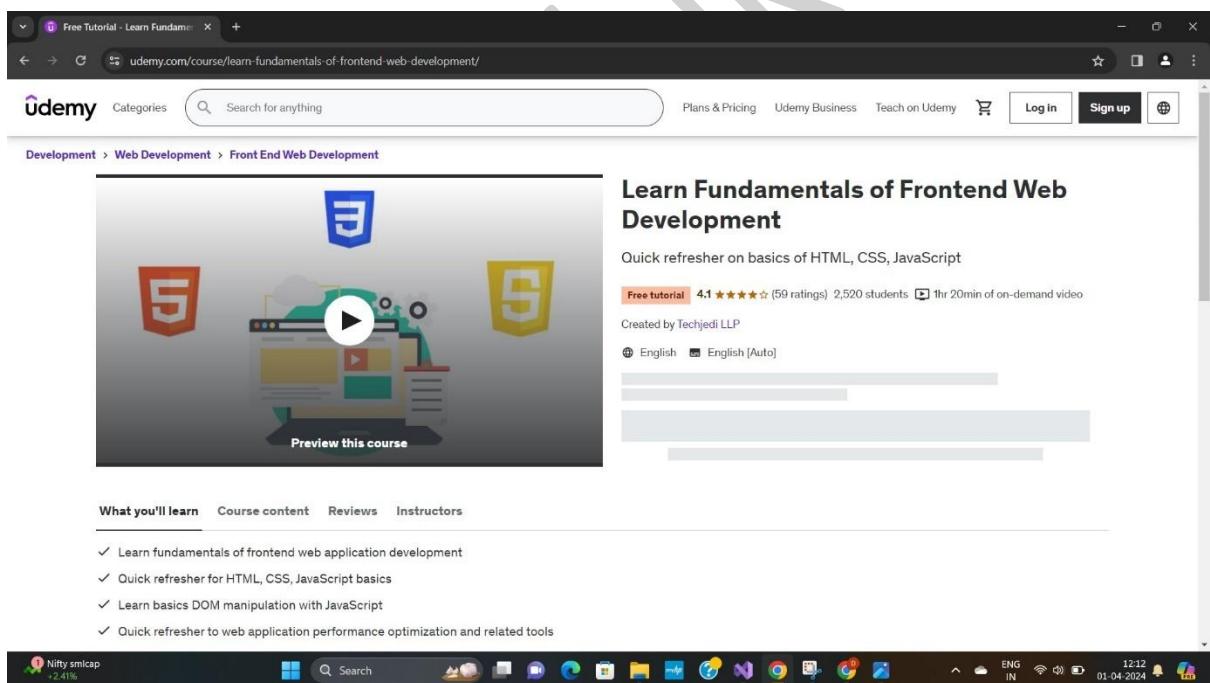

By clicking on that image it will show course details

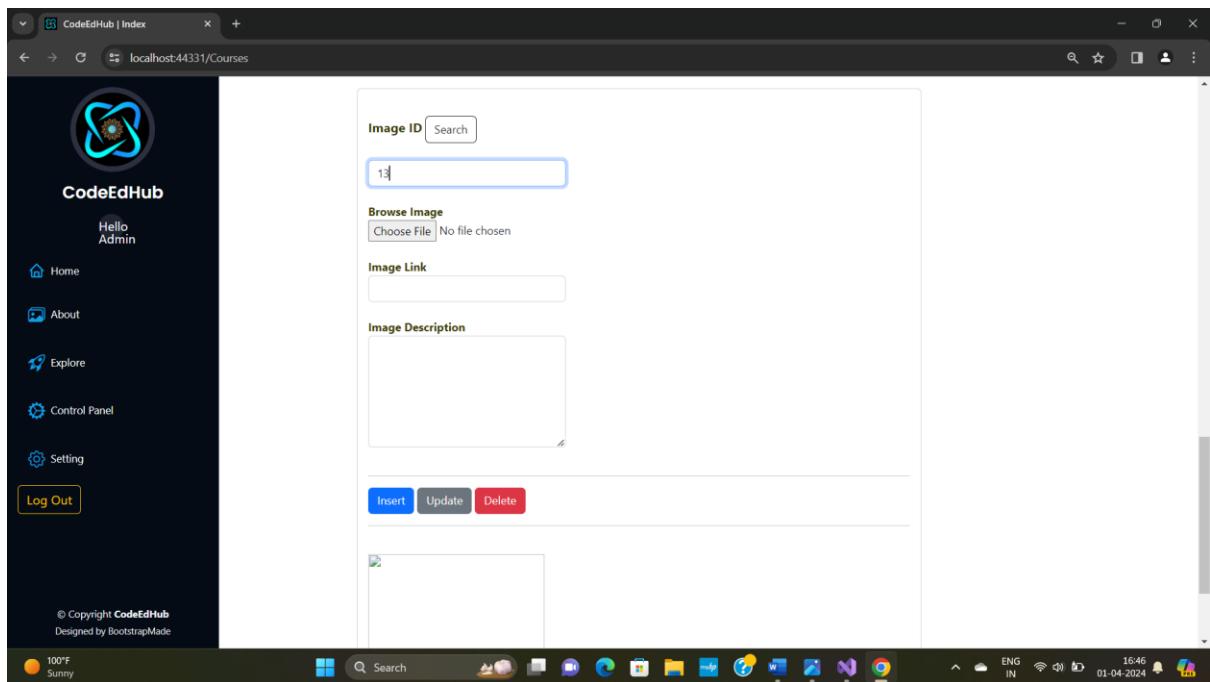

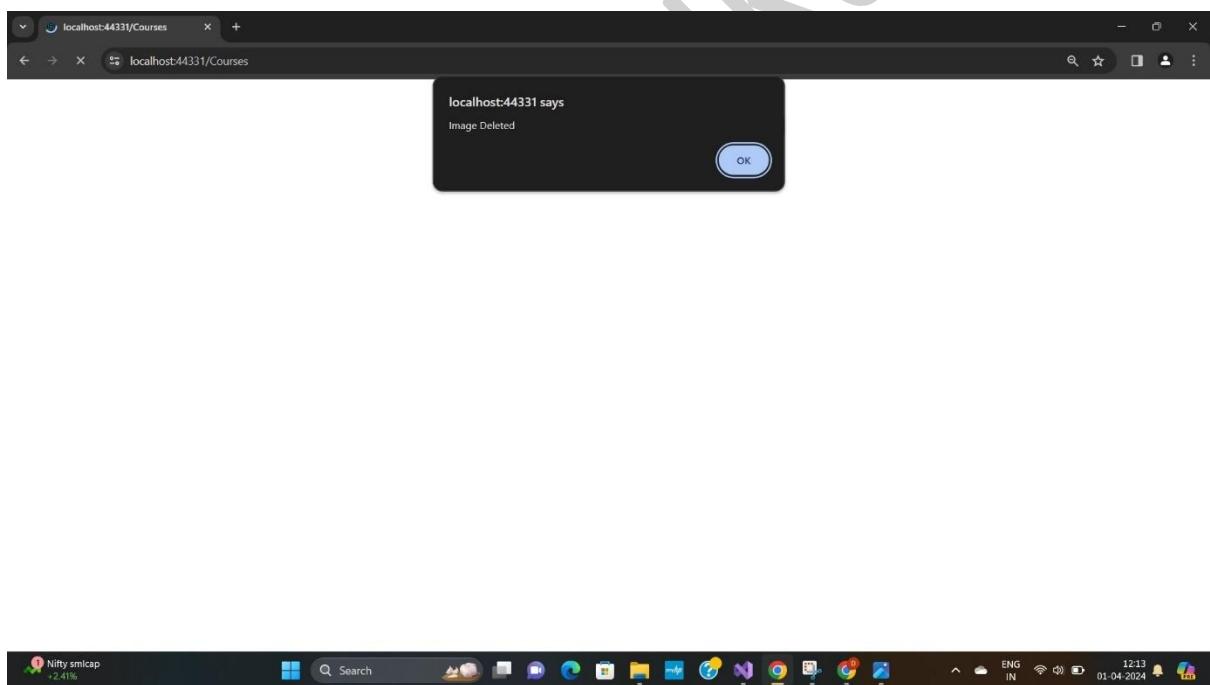

And by clicking on link icon it will redirect to that course page .

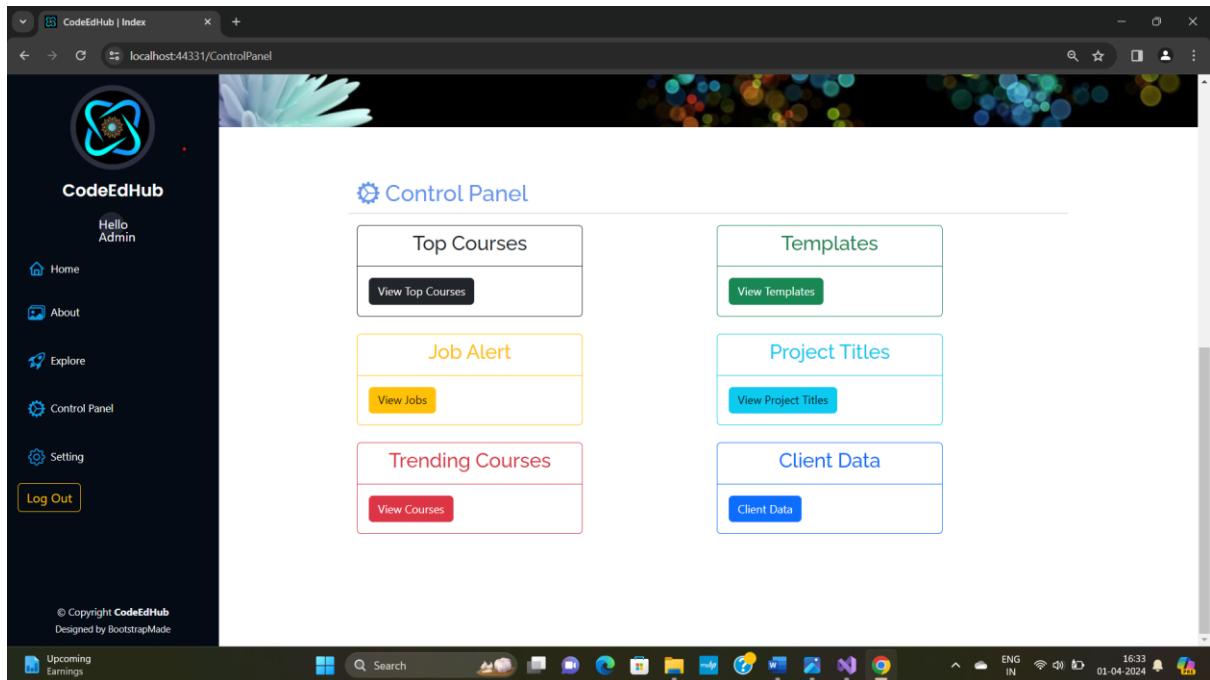

To delete course enter id of that specific course.

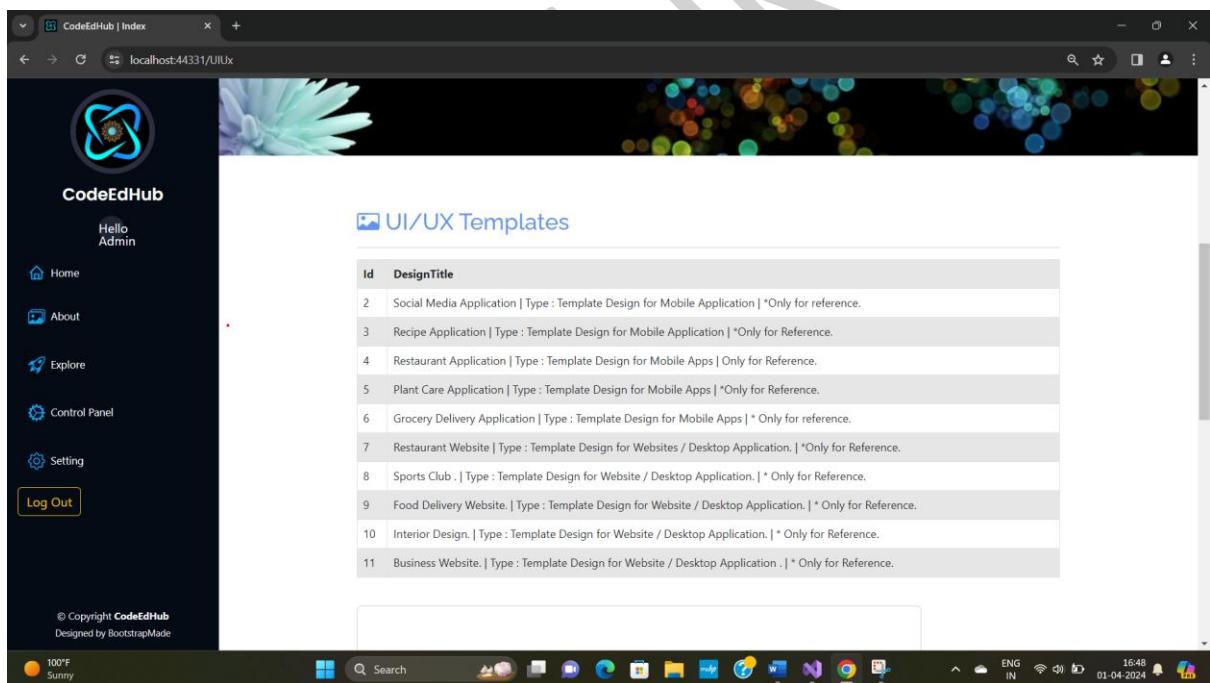

Course will be deleted.

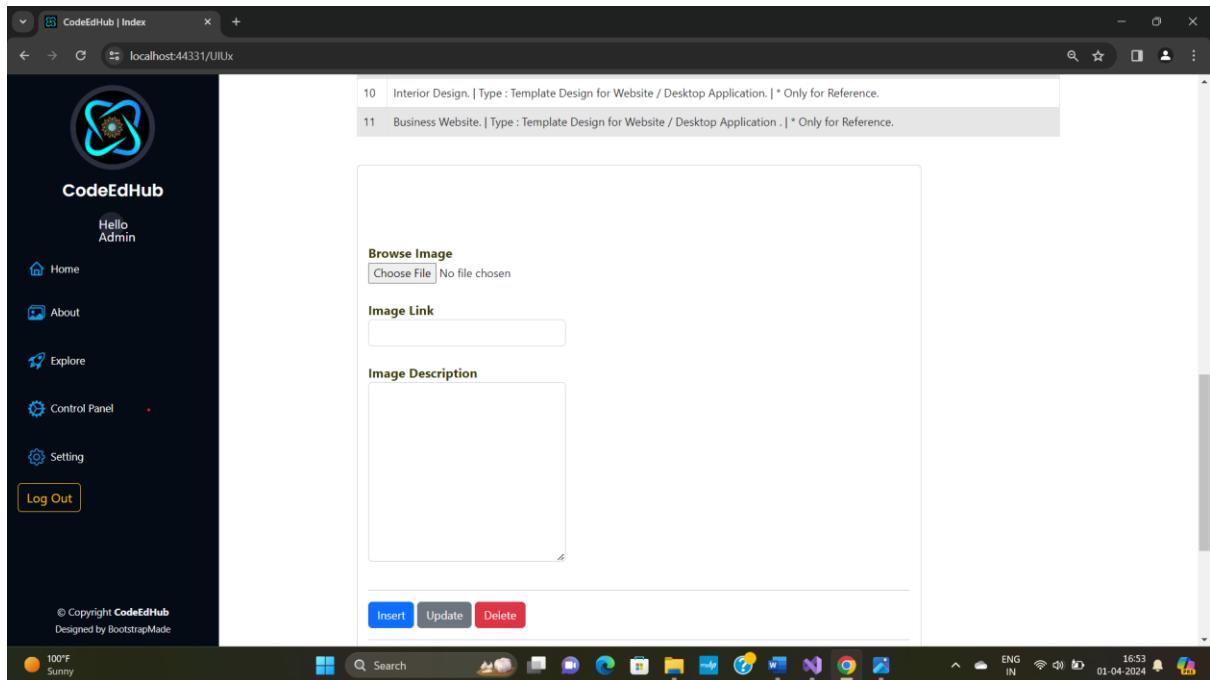

By clicking on View Templates it will redirect to page where admin can add, update, delete the templates for mobile and websites.

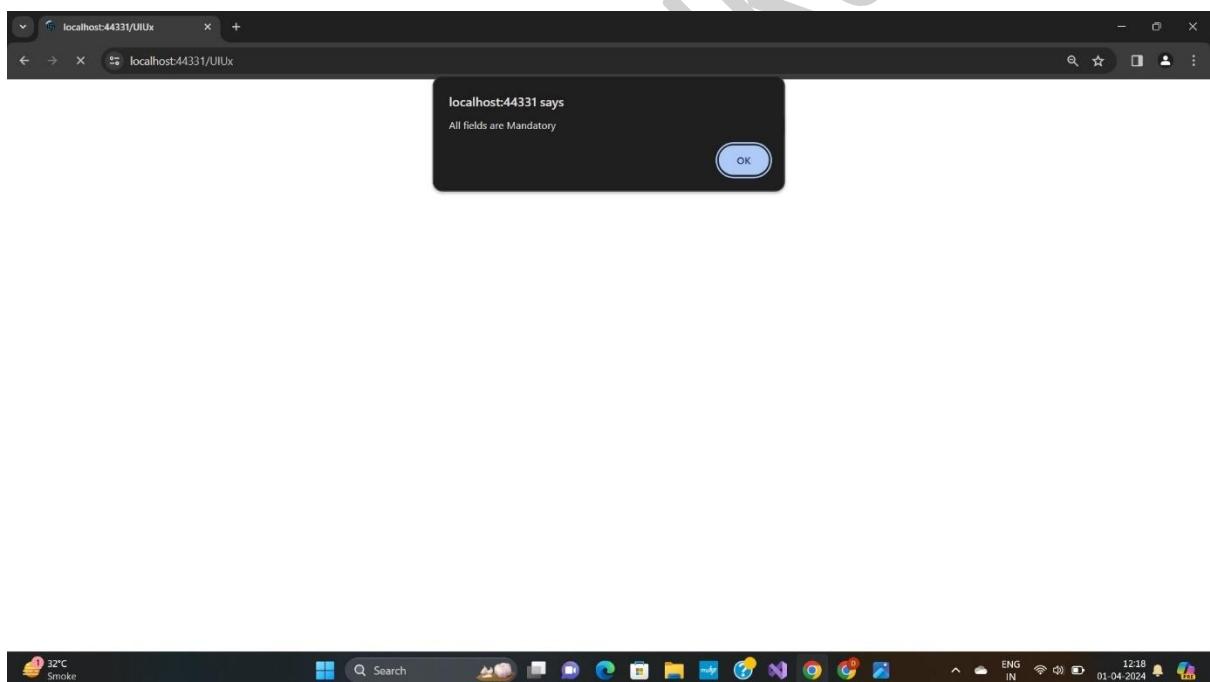

In gridview admin can inserted, updated and deleted courses at the same time.

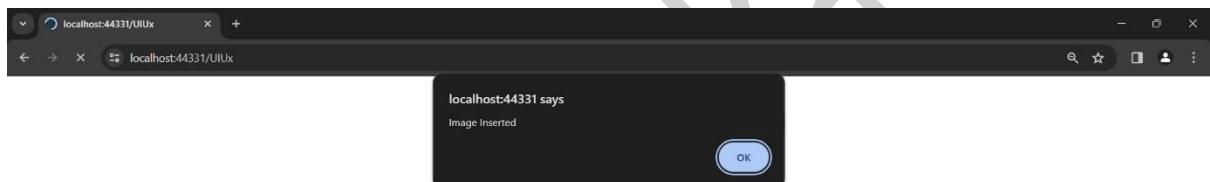

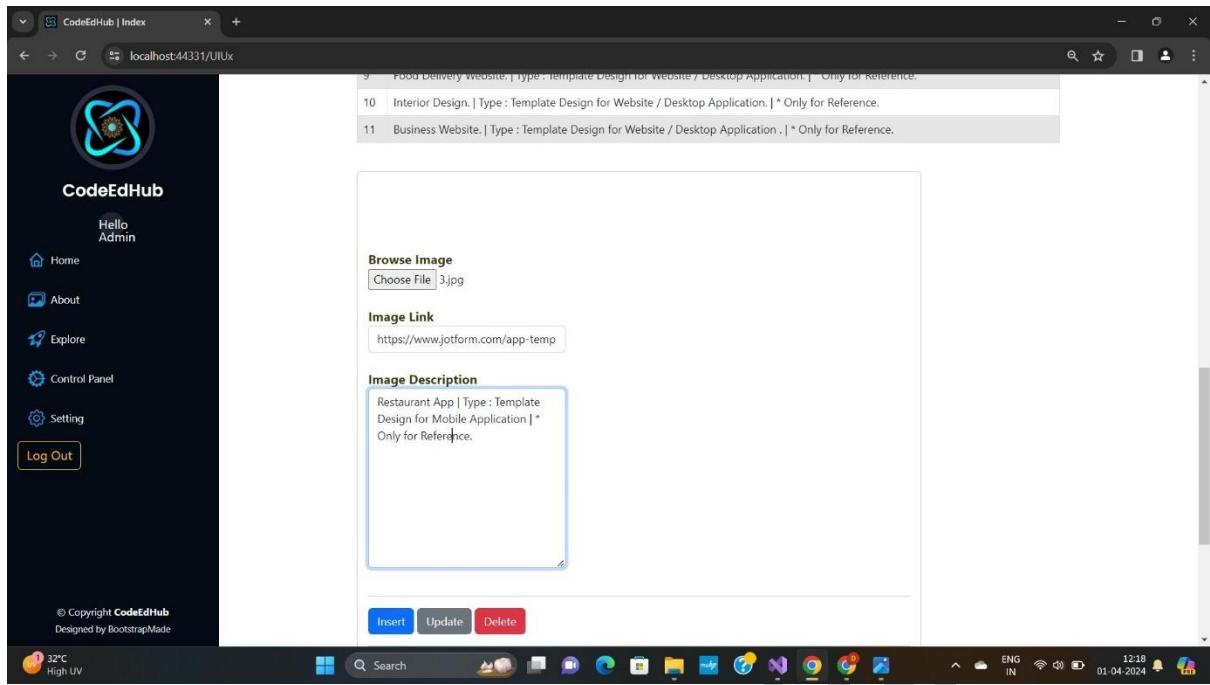

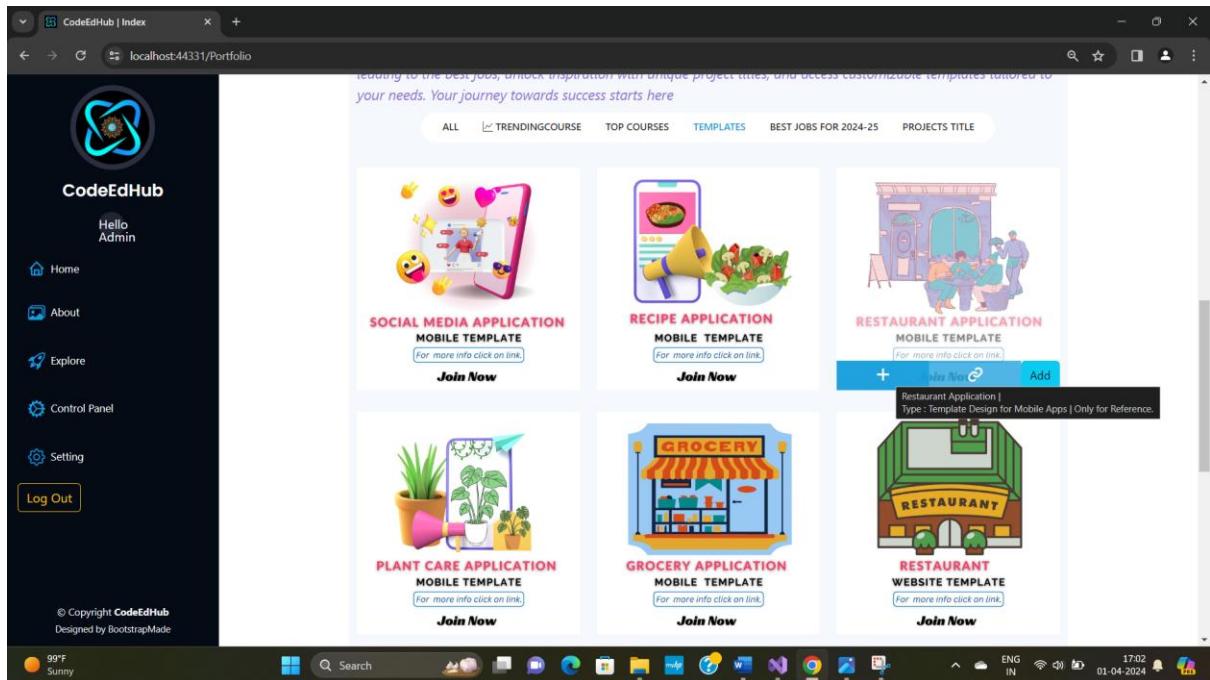

If admin directly clicks on insert button system will not allow to insert any blank data.

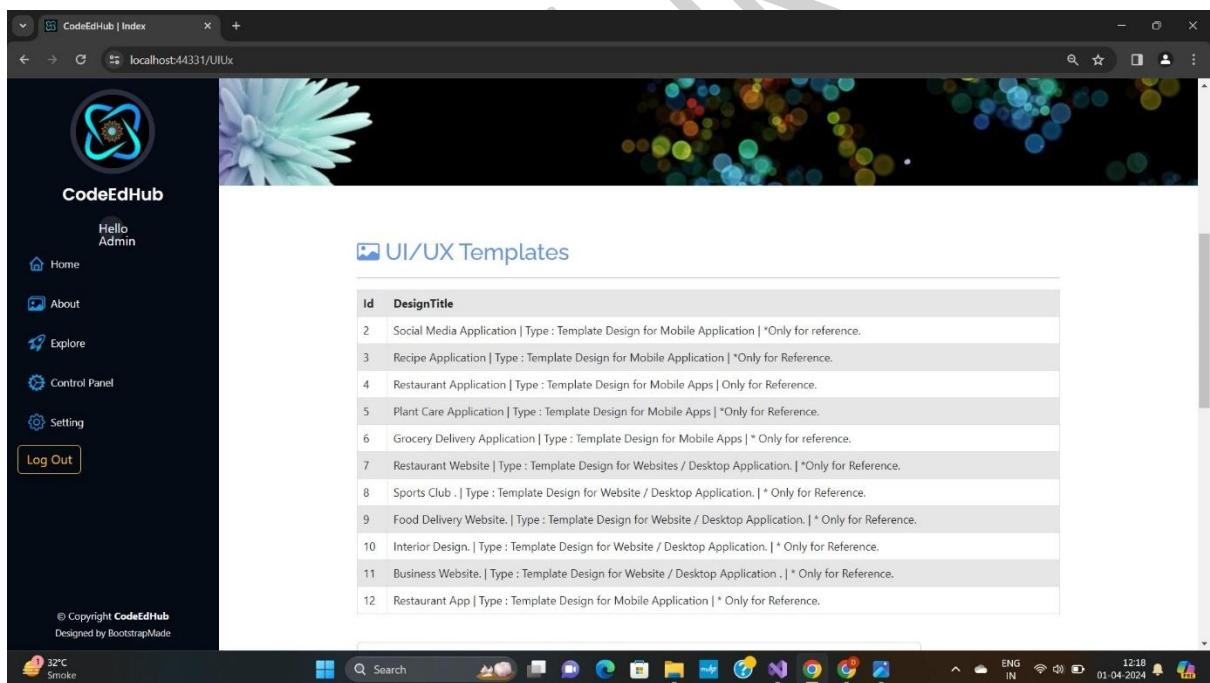

Inserting new template .

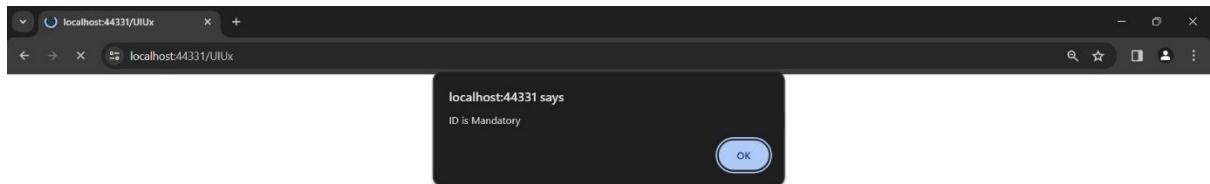

It will also display in explore section of website where user can interact with it. And by clicking on plus icon it will display details of that templates , clicking on link icon it will redirect the user to that template website where they can download or preview it.

And ont it will be shown in gridview on the spot with auto incremented ids.

If user need to update something in existing templates then with the use of id they can perform that action. But if admin click on update without entering any data, as usual system will not allow.

By clicking on search will give all data related with that id from database.

And if user need to delete that template , it just need an id to delete it.

When admin clicks on View jobs page will redirect Jobs Page where admin can perform desired actions.

A screenshot of a web application titled 'Control Panel'. The left sidebar has a dark theme with a logo, 'Hello Admin', and links for Home, About, Explore, Control Panel (which is selected), Setting, and Log Out. The main content area is titled 'Control Panel' and contains a grid of six cards: 'Top Courses' (View Top Courses), 'Templates' (View Templates), 'Job Alert' (View Jobs), 'Project Titles' (View Project Titles), 'Trending Courses' (View Courses), and 'Client Data' (Client Data). The background features a decorative banner with a flower and bokeh lights.

This gridview display the existing data .

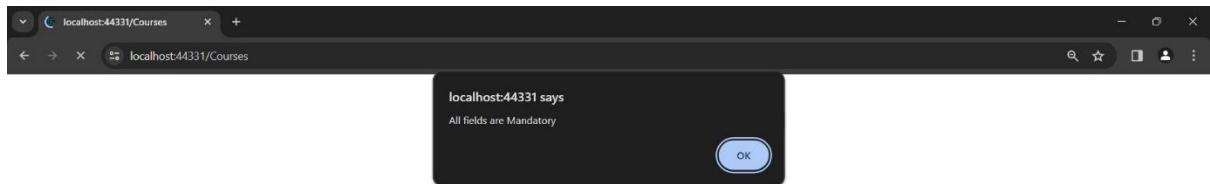

JobId	Title	Salary	Scope	Description
2	Machine learning Engineer	7,00,000 - 14,00,000	ML are likely to get a huge bump of 75% in the next 5 years.	ML Leads or Experts specialize in guiding ML projects and developing advanced models for business challenges.
3	Data Scientist	3,00,000 - 28,00,000	Rising demand for data scientists due to increasing reliance on data-driven decisions.	Data scientists analyze data to extract valuable insights and inform strategic decisions.
4	Cyber Security	4,00,000 - 10,00,000	Growing demand in next 5 year for cybersecurity experts to protect digital assets.	Cybersecurity professionals safeguard digital systems from malicious threats and breaches.
5	Digital Marketer	2,88,000 - 13,00,000	Digital marketers will remain essential for varied business strategies in 5 years.	Digital marketers drive diverse business strategies effectively through online channels.
6	Cloud Architect	3,59,206 - 23,59,206	In 5 years, cloud computing's scope expands for versatile business solutions.	Cloud architects design and manage cloud infrastructure for optimal business performance.
7	Full Stack Developer	60,000 - 7,25,000	There are huge openings in this branch of the IT sector.	Full Stack Developers build both front-end and back-end components of applications.
8	Project Manager	6,50,220 - 10,00,000	In 5 years, project managers pivotal for executing strategic initiatives efficiently.	A one who organizes, plans, and executes projects while working within restraints like budgets and schedules.

If admin directly click on insert button then system will not allow to entered any blank data.

The screenshot shows a form for inserting a new job. The fields are as follows:

- Title :** An empty input field.
- Salary :** An empty input field.
- Scope:** An empty input field.
- Description:** An empty input field.

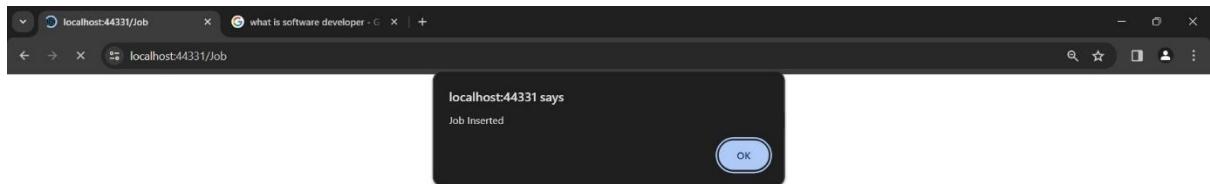

Below the form are three buttons: **Insert** (blue), **Update** (grey), and **Delete** (red).

A screenshot of a browser window with the URL 'localhost:44331/Job'. The page is titled 'CodeEdHub | Index'. On the left, there is a sidebar with a logo, the text 'Hello Admin', and links for Home, About, Explore, Control Panel, Setting, and Log Out. The main content area contains a form for a job listing:

- Title :** Software Developer
- Salary :** 5,00,000 - 15,00,000
- Scope:** United States as the country with the largest developer population by 2024.
- Description:** for designing and building computer programs.

At the bottom of the form are three buttons: Insert (blue), Update (dark gray), and Delete (red).

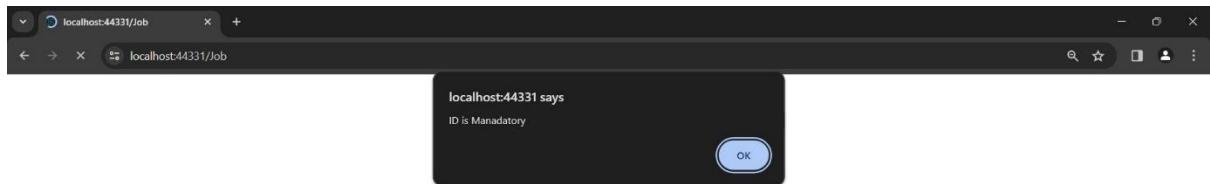

It will be also display in explore section of website.

A screenshot of the 'CodeEdHub' website. On the left is a sidebar with a logo, navigation links for Home, About, Explore, Control Panel, Setting, and Log Out. The main content area is titled 'Explore' and displays five job listings in cards:

- Digital Marketer**: 2.88,000 - 13.00,000. Description: Digital marketers will remain essential for varied business strategies in 5 years. Digital marketers drive diverse business strategies effectively through online channels.
- Full Stack Developer**: 60,000 - 72,50,000. Description: There are huge openings in this branch of the IT sector. Full Stack Developers build both front-end and back-end components of applications.
- Machine learning Engineer**: 7,00,000 - 14,00,000. Description: ML are likely to get a huge bump of 75% in the next 5 years. ML Leads or Experts specialize in guiding ML projects and developing advanced models for business challenges.
- Project Manager**: 6,50,220 - 10,00,000. Description: In 5 years, project managers pivotal for executing strategic initiatives efficiently. A one who organizes, plans, and executes projects while working within restraints like budgets and schedules.
- Software Developer**: 5,00,000 - 15,00,000. Description: India is projected to overtake the United States as the country with the largest developer population by 2024. A software developer is a professional who is responsible for designing and building computer programs.

The footer includes copyright information: '© Copyright CodeEdHub' and 'Designed by BootstrapMade'. The taskbar at the bottom is identical to the one in the previous screenshot.

To update existing job admin just need id and after clicking on search button data will be fetch from database and displays on screen . But if admin directly click on update button as usual system will not allow.

Search ENG IN 12:28 01-04-2024

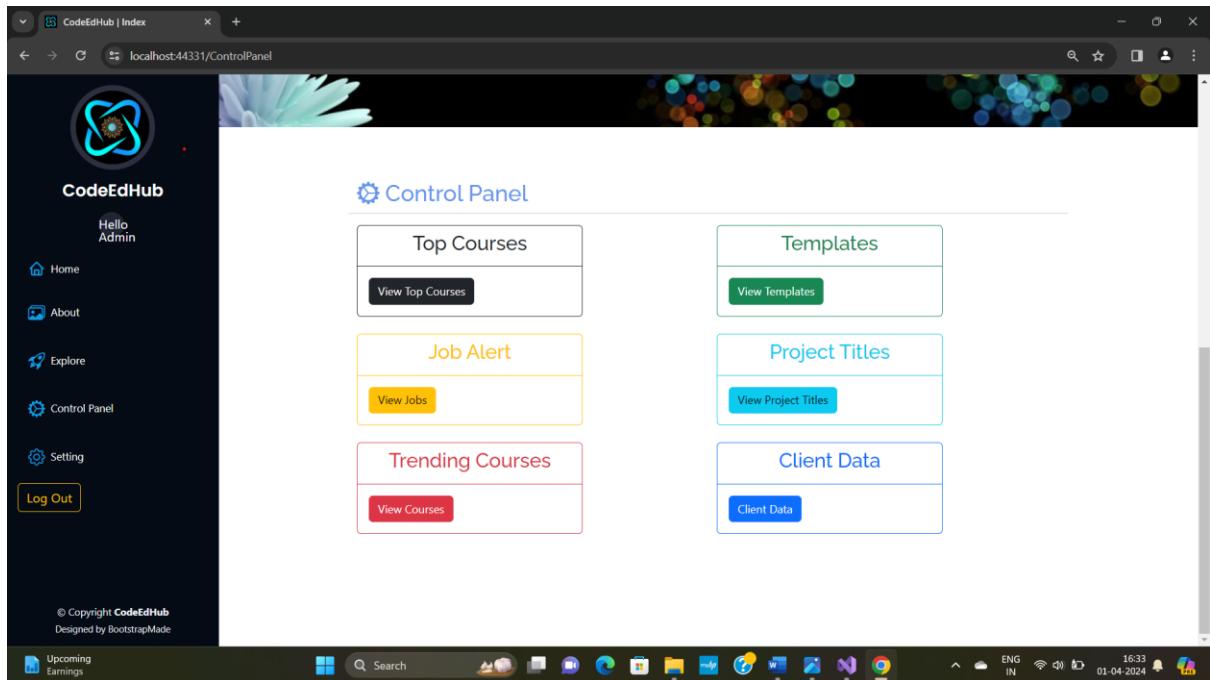

Jobs can be deleted with help of ids.

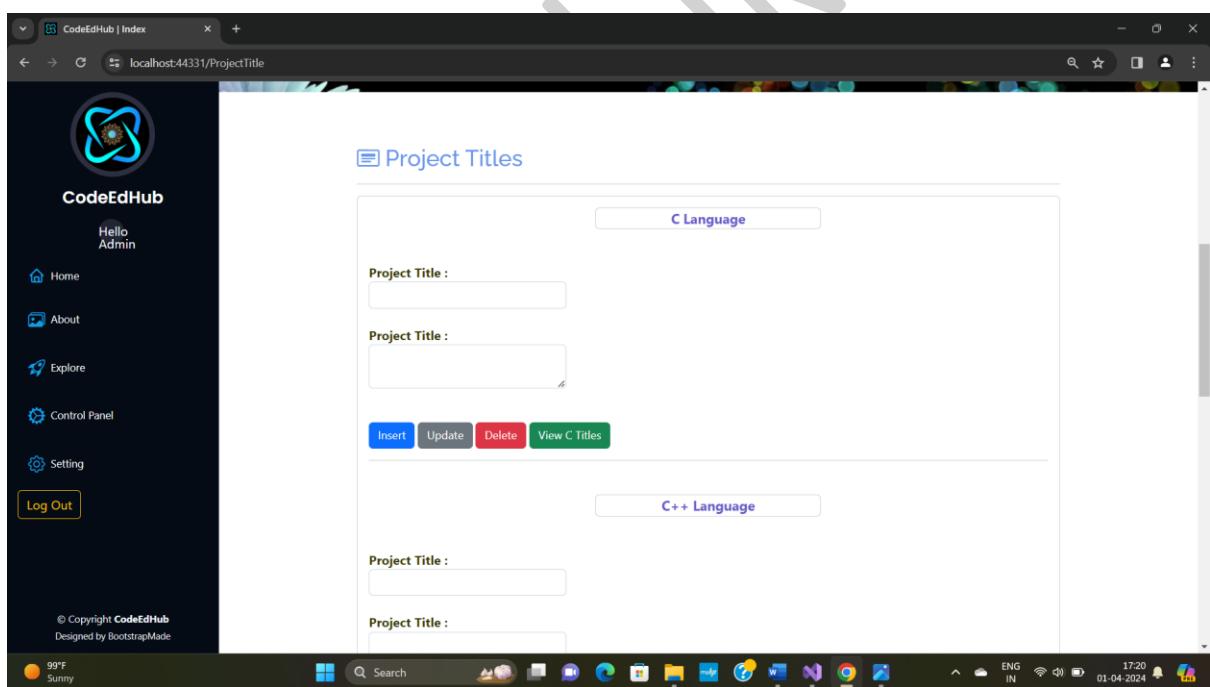

Click on delete.

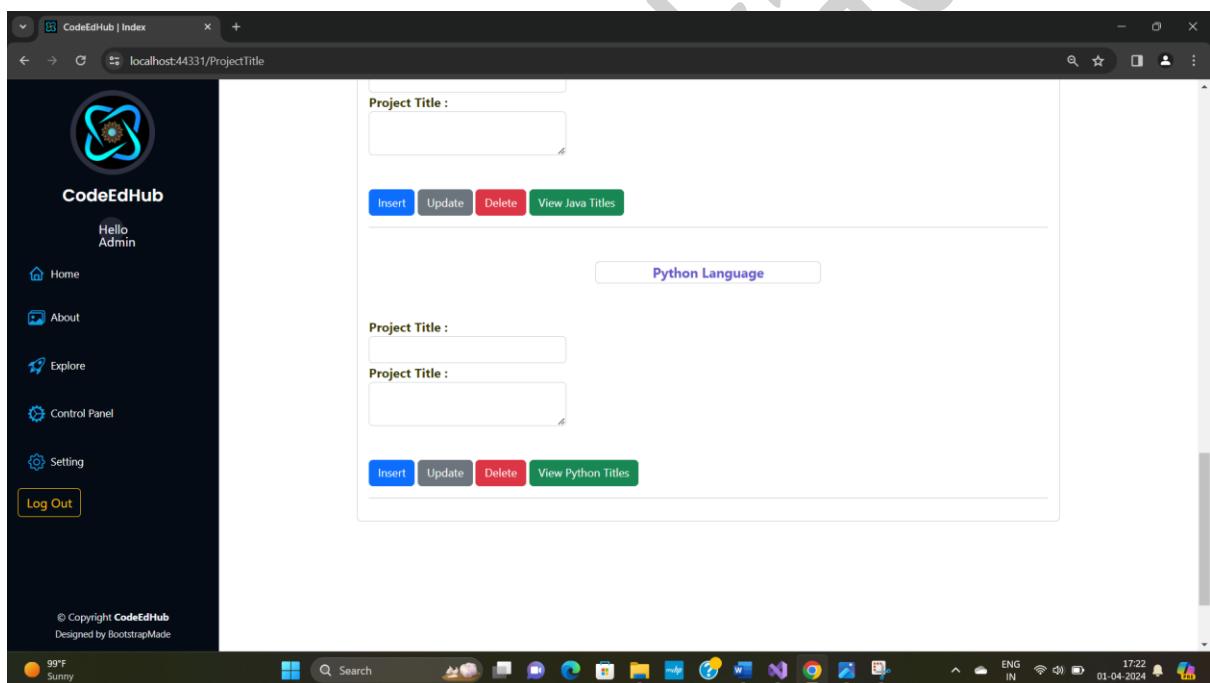

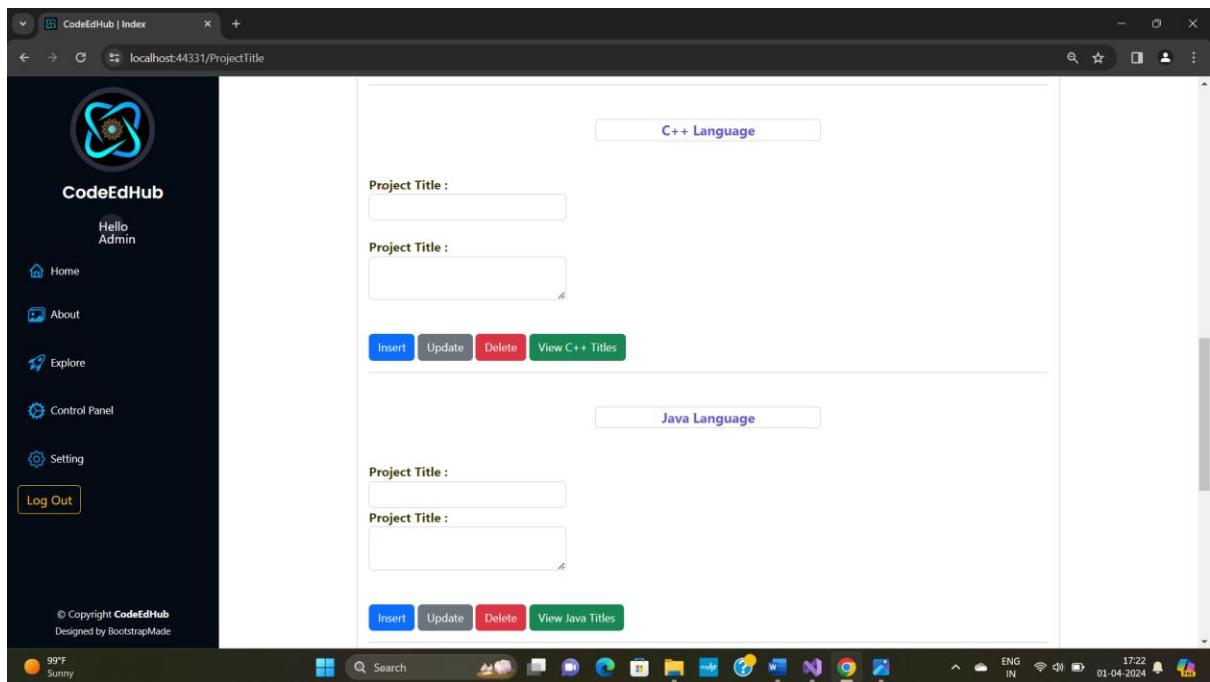

Clicking on View Project Title , page will redirect to Project Titles page where admin can manage all the things.

Clicking on View C Titles, C++ Titles, Java Titles, Python Titles it will show existing titles of that Language.

The screenshot shows the 'C Projects' section of the CodeEdHub application. The left sidebar displays a dark theme with a logo, 'Hello Admin', and navigation links: Home, About, Explore, Control Panel, Setting, and Log Out. The main content area has a light gray background. At the top right are four buttons: Insert (blue), Update (gray), Delete (red), and View C Titles (green). Below them is a table with columns 'CProjectId', 'CProjectTitle', and 'CDes'. The table contains five rows:

CProjectId	CProjectTitle	CDes
1	Code Craft	Develop a basic text-based role-playing game (RPG) in C, where players can navigate through different scenarios, interact with characters, and make decisions that affect the outcome of the game.
2	Simple Calculator	Build a basic calculator application that can perform arithmetic operations like addition, subtraction, multiplication, and division.
3	To-Do List Manager	Create a program that allows users to add, delete, and manage tasks in a to-do list. Include features like marking tasks as completed and displaying the list.
4	Text-Based Tic-Tac-Toe Game	Implement a text-based version of the classic Tic-Tac-Toe game where two players can take turns marking spaces on a grid.
9	Student Grade Tracker	Design a program for tracking and managing student grades. Allow users to input grades, calculate averages, and display summary statistics.

At the bottom center is a button labeled 'C++ Language'. The taskbar at the bottom shows various application icons and the date/time: 12:59 01-04-2024.

The screenshot shows the 'C++ Projects' section of the CodeEdHub application. The left sidebar is identical to the first screenshot. The main content area has a light gray background. At the top right is a single green button labeled 'C++ Language'. Below it are two text input fields labeled 'Project Title :'. The table from the first screenshot is present again, showing the same five project entries. The taskbar at the bottom shows various application icons and the date/time: 13:00 01-04-2024.

The screenshot shows a web application interface for managing project titles. On the left is a dark sidebar with a logo, 'Hello Admin' text, and navigation links: Home, About, Explore, Control Panel, Setting, and Log Out. The main content area has a header 'Java Language'. It contains two input fields labeled 'Project Title :', four buttons (Insert, Update, Delete, View Java Titles), and a table titled 'JavaProjectTitleId JavaProjectTitle JavaDes'. The table rows are:

JavaProjectTitleId	JavaProjectTitle	JavaDes
1	Simple Inventory Management System	Create a basic inventory management system for tracking products and their quantities. Allow users to add, remove, and update inventory items.
2	Employee Payroll Calculator	Develop a program that calculates employee pay based on hours worked and hourly rates. Include features for overtime calculation and deductions.
3	Text-Based Hangman Game	Implement a text-based version of the popular Hangman game where players try to guess a word by guessing individual letters.
4	Basic Chat Application	Build a simple chat application that allows users to send and receive messages over a local network. Use sockets for communication between clients.
6	Healthcare Appointment Scheduling System	Build a system for scheduling appointments at healthcare facilities using Java. Include features like appointment booking, patient registration, and notifications.

The status bar at the bottom shows system information: ENG IN, 01-04-2024, 13:00.

The screenshot shows a similar web application interface for managing project titles, but for the Python language. The layout is identical to the Java page, with a sidebar, a 'Python Language' header, two input fields, four buttons, and a table titled 'PythonProjectTitleId PythonProjectTitle PythonDes'. The table rows are:

PythonProjectTitleId	PythonProjectTitle	PythonDes
2	Eco Track	A Sustainable Living Dashboard - Monitoring and Analyzing Environmental Impact
3	Crypto Guardian	Implementing Blockchain-based Digital Asset Inheritance System with Python.
4	Quantum Pulse	Building a Quantum Computing Simulator in Python.
6	Word Count Tool	Develop a tool that counts the number of words, lines, and characters in a text file.
7	Basic Weather App	Build a simple weather application that retrieves weather data from an API based on user input (e.g., city or zip code) and displays the current weather conditions.
10	Basic Weather App	Build a simple weather application that retrieves weather data from an API based on user input (e.g., city or zip code) and displays the current weather conditions.

The status bar at the bottom shows system information: ENG IN, 01-04-2024, 13:01.

Inserting new C Project Title.

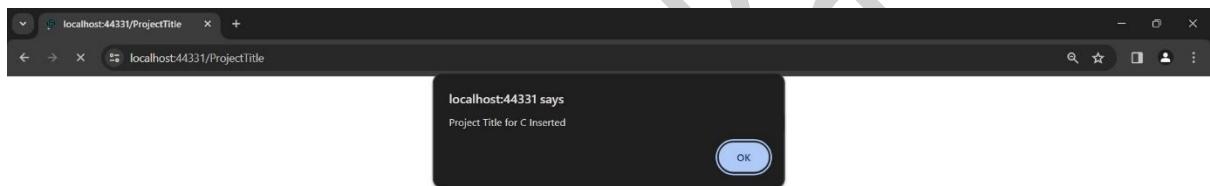

C Project Title

CProjectId	CProjectTitle	CDes
1	Code Craft	Develop a basic text-based role-playing game (RPG) in C, where players can navigate through different scenarios, interact with characters, and make decisions that affect the outcome of the game.
2	Simple Calculator	Build a basic calculator application that can perform arithmetic operations like addition, subtraction, multiplication, and division.

Project Title :
Clothing Store Management System

Project Title :
To develop a system which handles all work of store & data of customers.

Buttons: Insert, Update, Delete, View C Titles

The screenshot shows the CodeEdHub Admin Panel with a dark theme. On the left, a sidebar has a logo, 'Hello Admin', and links for Home, About, Explore, Control Panel, Setting, and Log Out. Below the sidebar is a copyright notice: '© Copyright CodeEdHub' and 'Designed by BootstrapMade'. The main content area has a header 'Project Title :' with an input field. Below it is another header 'Project Title :' with an input field. A row of buttons includes 'Insert' (blue), 'Update' (orange), 'Delete' (red), and 'View C Titles' (green). A table titled 'CProjectId' and 'CProjectTitle' lists various project titles with their descriptions. The table rows are numbered 1 through 11. The last row, number 11, is highlighted in blue. The table has columns for 'CProjectId', 'CProjectTitle', and 'CDes'. The descriptions for each project are as follows:

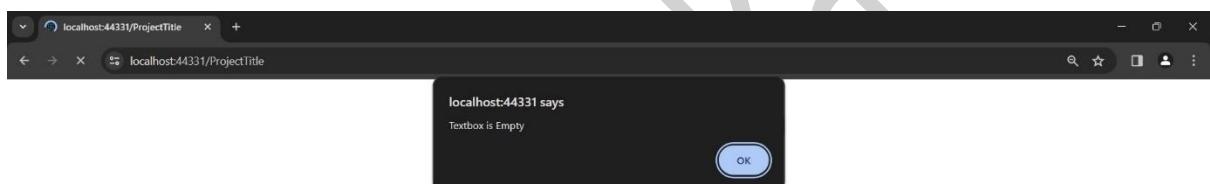

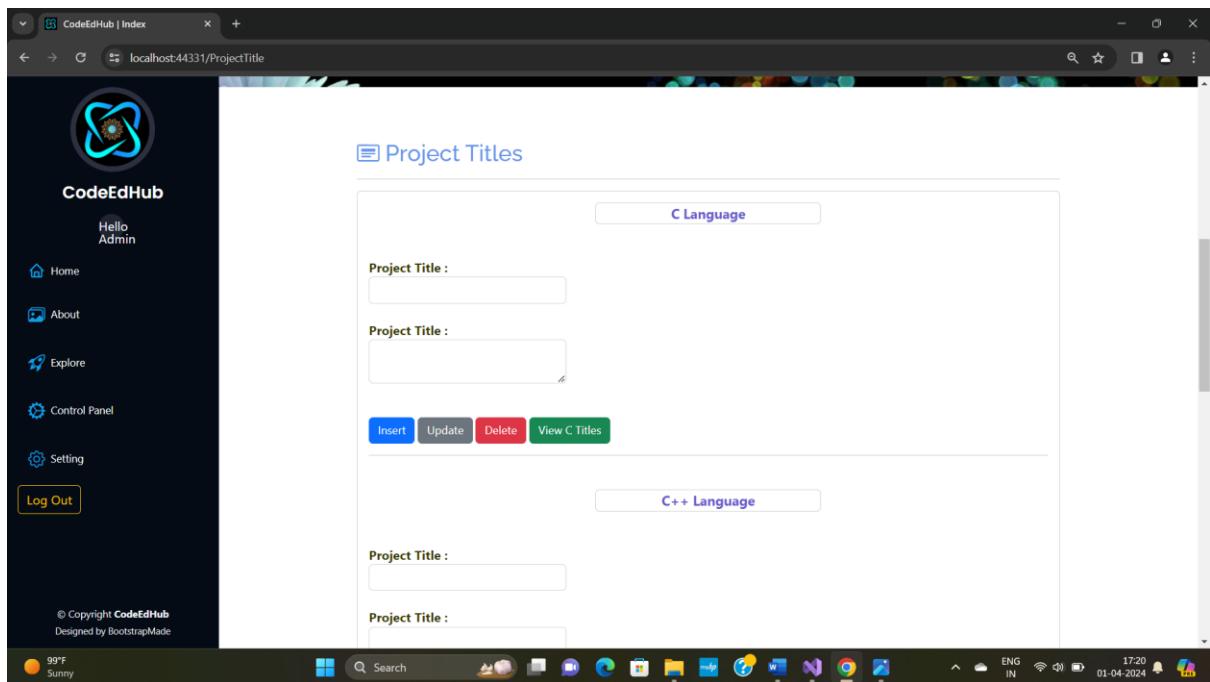

CProjectId	CProjectTitle	CDes
1	Code Craft	Develop a basic text-based role-playing game (RPG) in C, where players can navigate through different scenarios, interact with characters, and make decisions that affect the outcome of the game.
2	Simple Calculator	Build a basic calculator application that can perform arithmetic operations like addition, subtraction, multiplication, and division.
3	To-Do List Manager	Create a program that allows users to add, delete, and manage tasks in a to-do list. Include features like marking tasks as completed and displaying the list.
4	Text-Based Tic-Tac-Toe Game	Implement a text-based version of the classic Tic-Tac-Toe game where two players can take turns marking spaces on a grid.
9	Student Grade Tracker	Design a program for tracking and managing student grades. Allow users to input grades, calculate averages, and display summary statistics.
11	Clothing Store Management System	To develop a system which handles all work of store & data of customers.

And Title is inserted successfully. It will also display in explore section of website

The screenshot shows the CodeEdHub Explore section with a dark theme. The sidebar is identical to the Admin panel. The main content area has a heading 'Dive into our Explore section to discover trending courses that keep you ahead of the curve, explore top career paths leading to the best jobs, unlock inspiration with unique project titles, and access customizable templates tailored to your needs. Your journey towards success starts here.' Below this are several cards for different projects:

- Clothing Store Management System**: To develop a system which handles all work of store & data of customers. C Title
- Code Craft**: Develop a basic text-based role-playing game (RPG) in C, where players can navigate through different scenarios, interact with characters, and make decisions that affect the outcome of the game. C Title
- Simple Calculator**: Build a basic calculator application that can perform arithmetic operations like addition, subtraction, multiplication, and division. C Title
- Student Grade Tracker**: Design a program for tracking and managing student grades. Allow users to input grades, calculate averages, and display summary statistics. C Title
- To-Do List Manager**: Create a program that allows users to add, delete, and manage tasks in a to-do list. Include features like marking tasks as completed and displaying the list. C Title
- Text-Based Tic-Tac-Toe Game**: Implement a text-based version of the classic Tic-Tac-Toe game where two players can take turns marking spaces on a grid. C Title
- Simple Address Book**: Develop an address book application that allows users to add, edit, and C Title
- Library Management System**: C Title

But if admin directly click on insert button then system will not allow to insert any blank data.

Now, if admin needs to update existing title , just enter id and click on search button it will fetch all data related to it.

The screenshot shows a web application interface titled "Project Titles". On the left, there is a dark sidebar with a logo, the text "CodeEdHub", and a "Hello Admin" message. Below this are links for "Home", "About", "Explore", "Control Panel", "Setting", and a "Log Out" button. At the bottom of the sidebar, it says "© Copyright CodeEdHub Designed by BootstrapMade". The main content area has a header "Project Titles". It features a search bar with "ID : 9" and a "Search" button. Below the search bar are two input fields labeled "Project Title :" with placeholder text. At the bottom of the main area are four buttons: "Insert", "Update", "Delete", and "View C Titles". A "C Language" tab is visible above the input fields. The status bar at the bottom shows system information like weather (99°F, Sunny), date (01-04-2024), and time (17:30).

This screenshot is similar to the one above, showing the "Project Titles" page. However, the second input field under "Project Title :" now contains the text "Student Grade Tracker". Below this input field is a detailed description box containing the text: "Design a program for tracking and managing student grades. Allow users to input grades, calculate averages, and display summary statistics." The rest of the interface, including the sidebar, tabs, and status bar, remains the same.

Now admin can perform desired actions.

To delete , just enter id and Project Title will be deleted.

The screenshot shows a web application titled "CodeEdHub" with a dark theme. On the left, a sidebar has a logo, the text "Hello Admin", and links for Home, About, Explore, Control Panel, Setting, and Log Out. The main content area is titled "Project Titles" and shows a table of projects for the "C Language". The table has columns for CProjectId, CProjectTitle, and CDes. The data is as follows:

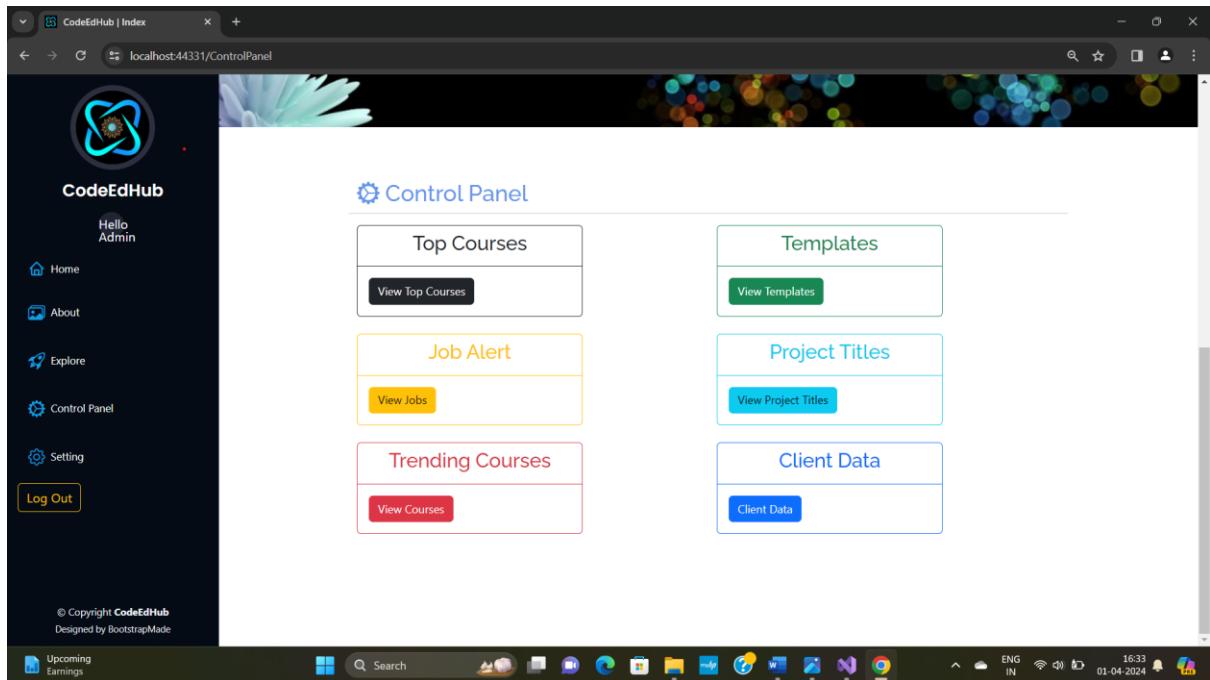

CProjectId	CProjectTitle	CDes
1	Code Craft	Develop a basic text-based role-playing game (RPG) in C, where players can navigate through different scenarios, interact with characters, and make decisions that affect the outcome of the game.
2	Simple Calculator	Build a basic calculator application that can perform arithmetic operations like addition, subtraction, multiplication, and division.
3	To-Do List Manager	Create a program that allows users to add, delete, and manage tasks in a to-do list. Include features like marking tasks as completed and displaying the list.
4	Text-Based Tic-Tac-Toe Game	Implement a text-based version of the classic Tic-Tac-Toe game where two players can take turns marking spaces on a grid.
9	Student Grade Tracker	Design a program for tracking and managing student grades. Allow users to input grades, calculate averages, and display summary statistics.
11	Clothing Store Management System	To develop a system which handles all work of store & data of customers.

At the bottom of the page, there are buttons for Insert, Update, Delete, and View C Titles. The status bar at the bottom right shows the date and time as 01-04-2024 13:07.

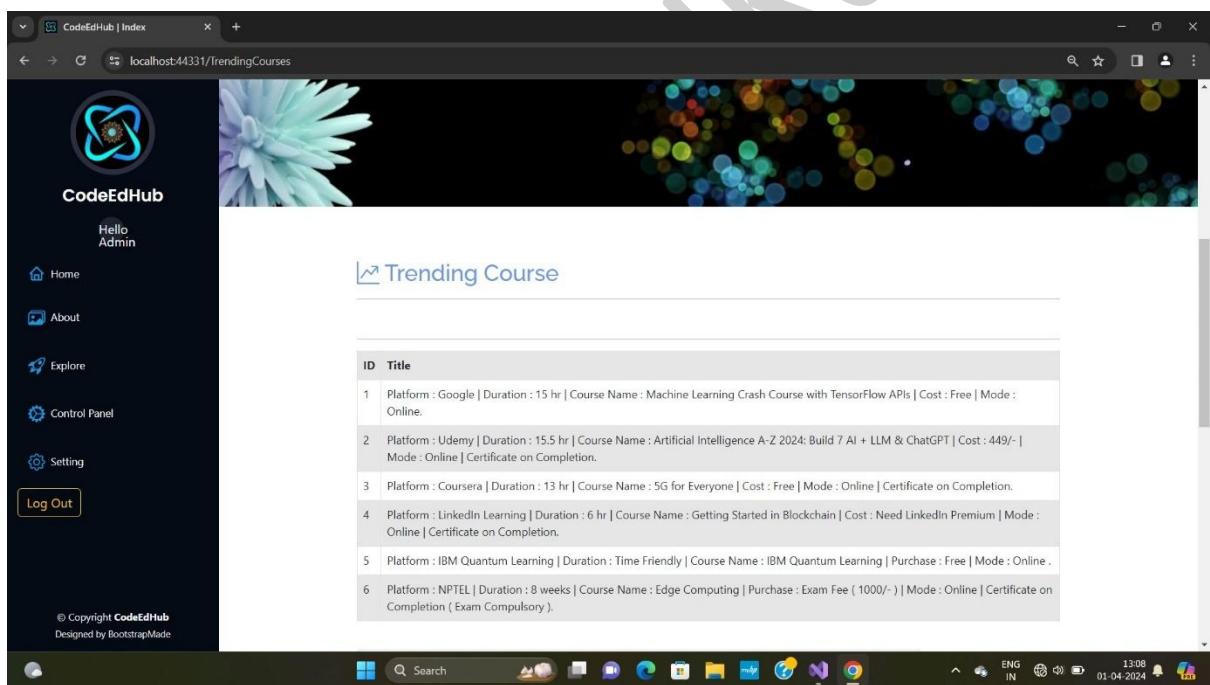

A modal dialog box is displayed with the text "localhost:44331 says" and "Project Title for C has been deleted". A blue "OK" button is at the bottom right of the dialog.

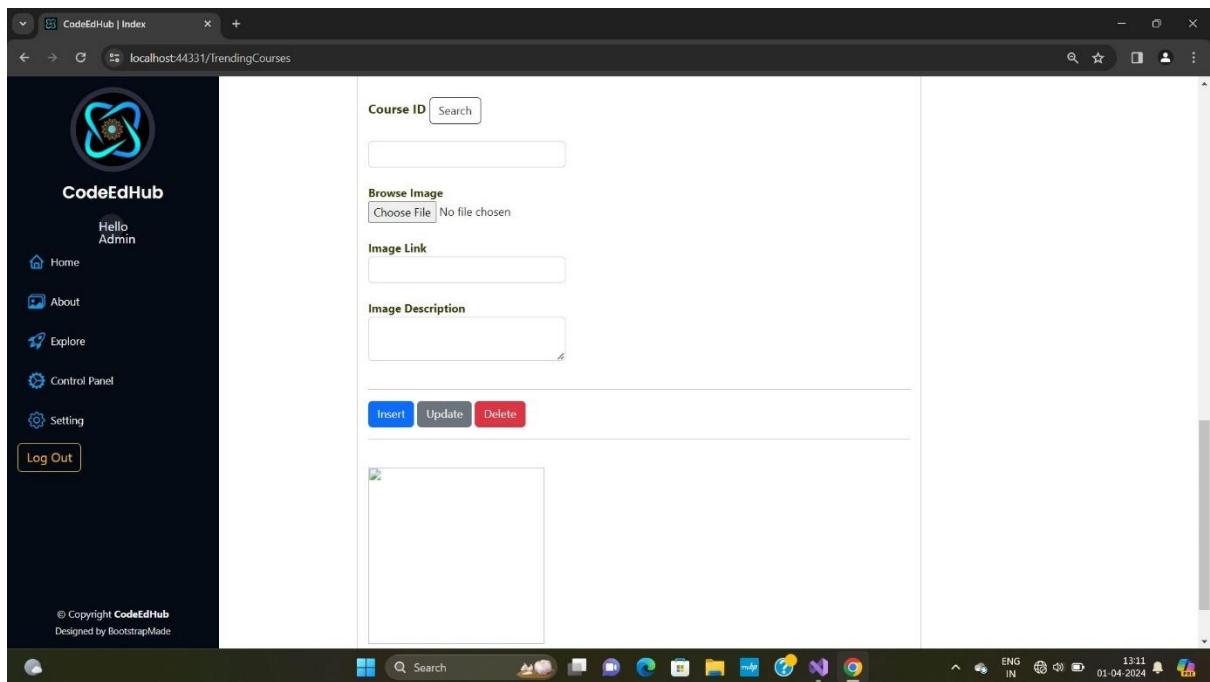

Same actions apply for C++ , Java and Python Project Titles.

Now, for Trending courses, Clicking on View Courses page will redirect to Coures page where admin can manage everything related to it.

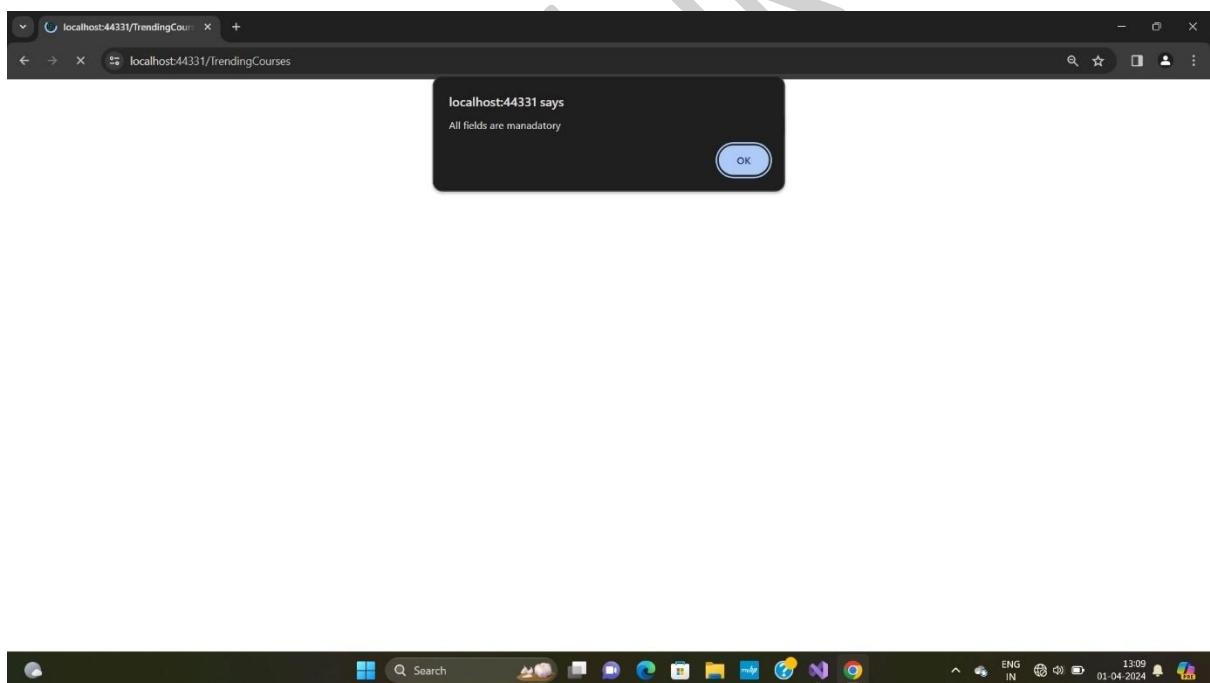

This gridview helps to display inserted, updated, deleted course details.

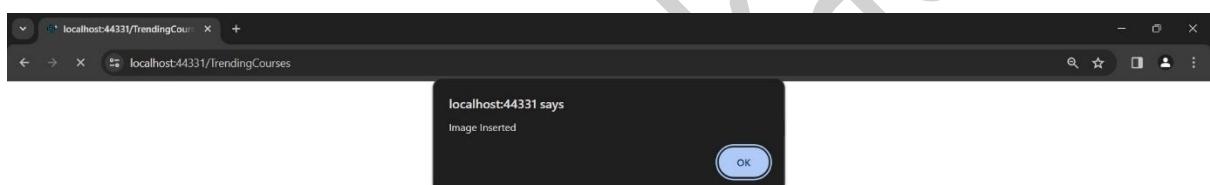

Directly clicking on insert button , will not enter any data.

By filling all required details will insert it successfully.

The screenshot shows a web application titled "CodeEdHub" running on a local host. The left sidebar is dark-themed with white text and icons, featuring a logo, the title "CodeEdHub", and navigation links: Home, About, Explore, Control Panel, Setting, and Log Out. Below the sidebar, a copyright notice reads "© Copyright CodeEdHub Designed by BootstrapMade". The main content area displays a gridview of course entries. The first entry is partially visible. The second entry includes a "Browse Image" section with a file input field containing "15.jpg", an "Image Link" section with a URL "https://developers.google.com/mac", and an "Image Description" section with the text: "Platform : Google | Duration : 15 hr | Course Name : Machine Learning Crash Course with TensorFlow APIs | Cost : Free | Mode : Online.". At the bottom of this card are three buttons: Insert (blue), Update (white), and Delete (red). The status bar at the bottom of the browser window shows the time as 13:15 and the date as 01-04-2024.

Displaying in gridview as well as in explore section.

To update just enter id and click on search button.

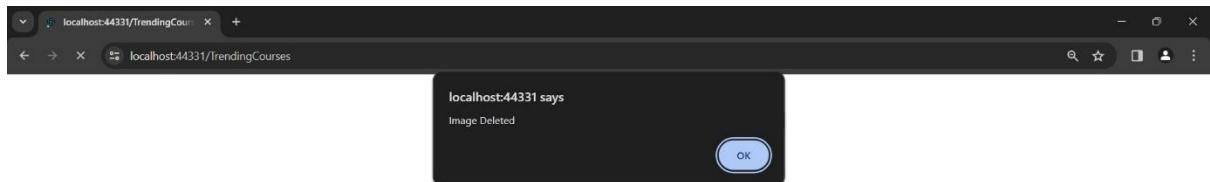

Textboxes will be filled with data , now admin can update it easily.

To delete course just enter id of it and click delete.

A screenshot of the 'CodeEdHub' application. The left sidebar shows a dark theme with a logo, 'Hello Admin', and navigation links: Home, About, Explore, Control Panel, Setting, and Log Out. The main content area displays a list of 'Trending Courses' with items 5, 6, and 7. Below this is a form for deleting a course, featuring fields for Course ID (with value '1'), Browse Image (with a placeholder 'Choose File'), Image Link (empty), and Image Description (empty). At the bottom of the form are three buttons: Insert (blue), Update (gray), and Delete (red). The bottom of the screen shows a Windows taskbar with various pinned icons and system status.

To know how many users are registering on website and to know query or messages of clients click on Client Data.

A screenshot of a web application titled 'Control Panel' on the 'localhost:44331/ControlPanel' page. The interface has a dark sidebar on the left with a logo and navigation links: Home, About, Explore, Control Panel (which is selected), Setting, and Log Out. The main content area is titled 'Control Panel' and contains several cards: 'Top Courses' (with a 'View Top Courses' button), 'Templates' (with a 'View Templates' button), 'Job Alert' (with a 'View Jobs' button), 'Project Titles' (with a 'View Project Titles' button), 'Trending Courses' (with a 'View Courses' button), and 'Client Data' (which is highlighted with a red border and has a 'Client Data' button). The footer includes copyright information ('© Copyright CodeEdHub') and a weather widget ('95°F Sunny'). The Windows taskbar at the bottom shows standard icons and system status.

To view clients messages click on client data it will display details or query of clients.

The screenshot shows a web browser window titled "CodeEdHub | Index" with the URL "localhost:44331/ClientData". The left sidebar is dark-themed with white icons and text, showing "Hello Admin" and links for Home, About, Explore, Control Panel, Setting, and Log Out. The main content area has a light background with a decorative flower image at the top. It displays a table titled "Client Data" with two tabs: "Client Messages" (selected) and "Registered User". The "Client Messages" tab shows two rows of data:

ClientId	ClientName	ClientMail	ClientNumber	ClientMsgs
1	Jenny Miller	jenny@gmail.com	0987654321	I want some material related to UI/UX Mobile App Design
3	Maira	maira@gmail.com	0987654321	hi i maira wanted some unique project title for C .

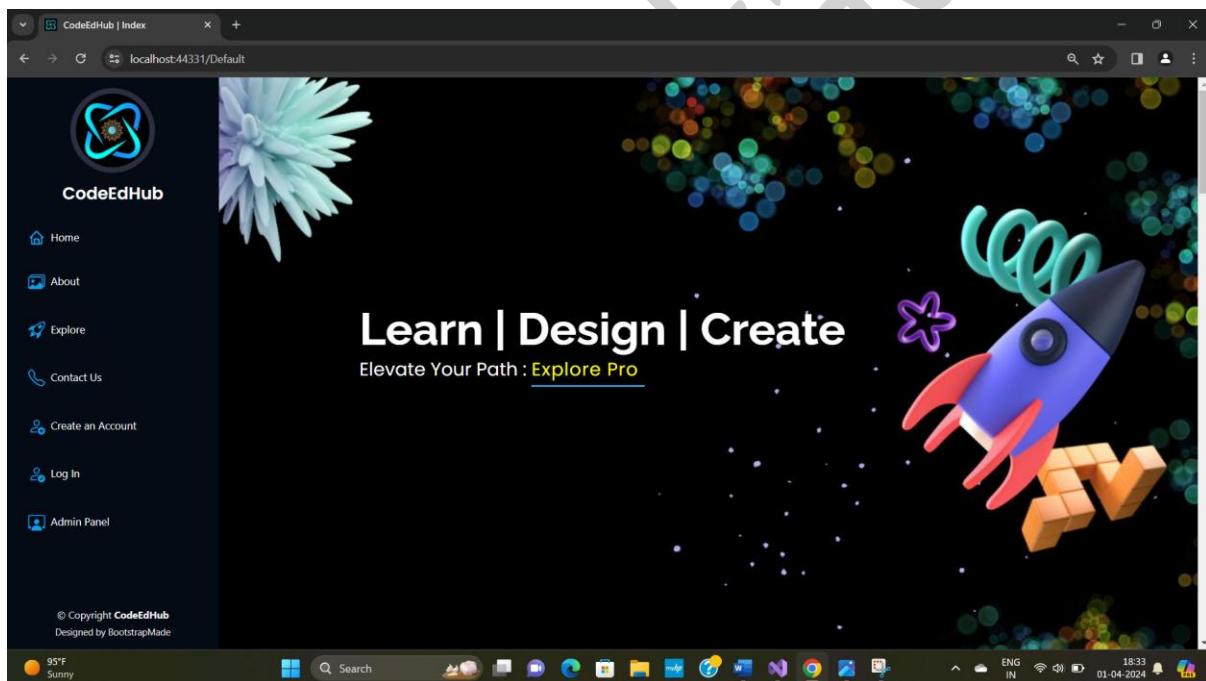

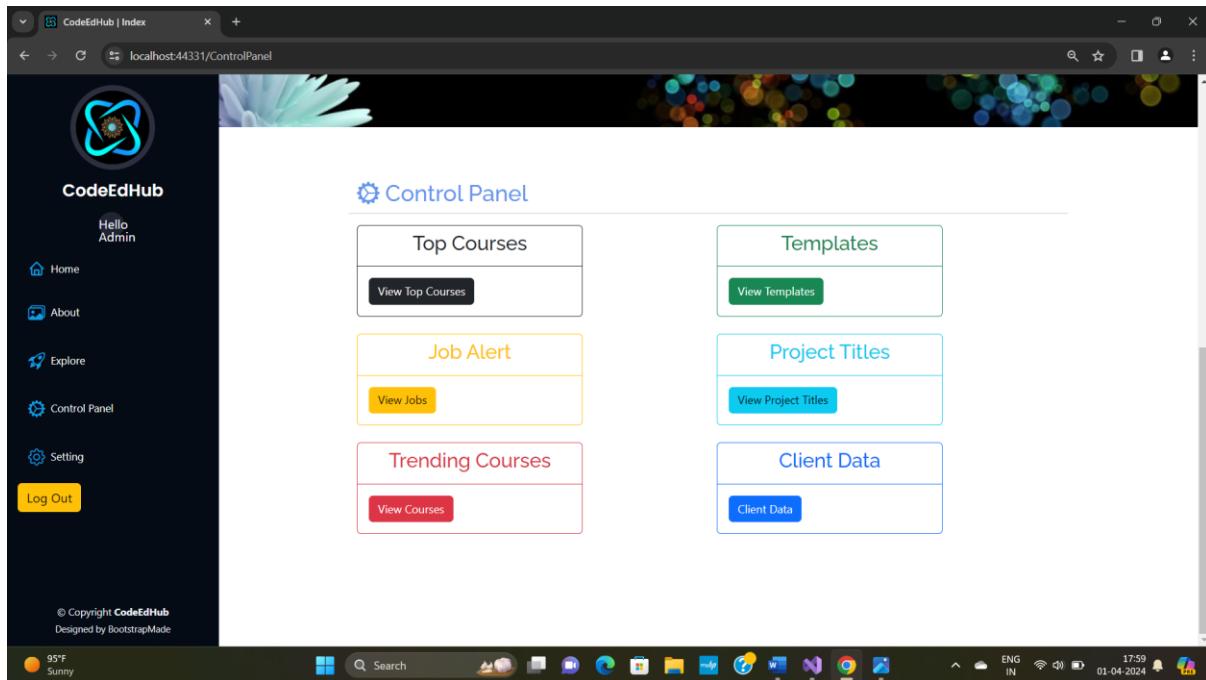

The "Registered User" tab is also visible. The bottom status bar shows system information like battery level, network, and date/time.

To view registered user click on Registered User button.

The screenshot shows the same web browser window and sidebar as the previous one. The "Registered User" tab is now selected in the "Client Data" section. The table shows the following data:

RegisterId	Username	Mail	Password	ConfirmPassword
1	Jenny	jeeny@gmail.com	jenny@13	jenny@13
2	Sneha	sneha@gmail.com	mnbvc@xz	mnbvc@xz

9	Priya	priya@yahoo.com	priya@098	priya@098

Clicking on Logout admin will be logout and redirected to index page.

5. Testing

We meticulously verified the functionality and performance of our platform using simple yet effective testing methods. We crafted basic test cases to ensure key features worked as intended, covering common usage scenarios. With limited resources, we conducted manual testing and utilized readily available tools like browser developer tools for debugging. Through this process, we identified and resolved issues promptly, prioritizing the smooth user experience. While our testing scope was modest, our dedication to quality assurance ensured CodeEdHub met basic standards of reliability and usability at the student level.

6. Proposed Enhancements

These enhancements are aimed at refining existing features and introducing new capabilities within the constraints at our level of project. Suggestions may include:

User Interface Refinements : Enhancing the user interface design to improve usability and aesthetics, such as implementing clearer navigation and more intuitive controls.

Feature Expansion : Introducing additional features to enrich the learning experience, such as interactive quizzes, discussion forums, or personalized learning paths.

Performance Optimization : Optimizing code and database queries to improve performance, reducing load times, and ensuring a smoother user experience, especially during peak usage.

Mobile Responsiveness : Adapting the platform to be responsive across various devices, including smartphones and tablets, to cater to the evolving needs of users.

Enhanced Content Management : Improving content management capabilities for administrators, including better organization tools, version control, and analytics to track usage and performance.

Community Engagement Features : Introducing features to foster a sense of community among users, such as user profiles, social sharing, or peer-to-peer mentoring.

Security Enhancements : Strengthening security measures to protect user data and ensure compliance with privacy regulations, such as implementing encryption, secure authentication.

In addition to the proposed enhancements mentioned earlier, we plan to further enrich CodeEdHub by incorporating comprehensive course materials covering fundamental programming languages such as C, C++, Java, Python, HTML, CSS, and JavaScript. These materials will cater to users ranging from beginners to intermediate learners, covering topics from basic variable declaration to advanced concepts like database connectivity.

8.Conclusion

In conclusion, CodeEdHub stands as a beacon of learning and growth in the realm of technology. With a commitment to innovation, accessibility, and learning engagement, we strive to empower learners of all levels with the resources needed to succeed in their programming journey. Tailored for beginners entering the world of programming and web development.
